WAR DEPARTMENT,  
OFFICE OF THE CHIEF OF STAFF,  
WASHINGTON.

November 14, 1918.

With the signing of the Armistice on November 11, 1918, the World War has been practically brought to an end. The events of the past four years have been of such magnitude that the various steps, the numberless battles, and the growth of Allied power which led up to the final victory are not clearly defined even in the minds of many military men. A history of this great period which will state in an orderly fashion this series of events will be of the greatest value to the future students of the war, and to everyone of the present day who desires to refer in exact terms to matters which led up to the final conclusion.

The war will be discussed and re-discussed from every angle and the sooner such a compilation of facts is available, the

more valuable it will be. I understand that this History of the World War intends to put at the disposal of all who are interested, such a compendium of facts of the past period of over four years; and that the system employed in safeguarding the accuracy of statements contained in it will produce a document of great historical value without entering upon any speculative conclusions as to cause and effect of the various phases of the war or attempting to project into an historical document individual opinions. With these ends in view, this History will be of the greatest value.

A handwritten signature in dark ink, reading "P. B. March". The signature is written in a cursive style, with the first letters of each name being capitalized and prominent. The "P" and "M" are particularly large and stylized.

General,

Chief of Staff,

United States Army.

## FOREWORD

THIS is a popular narrative history of the world's greatest war. Written frankly from the viewpoint of the United States and the Allies, it visualizes the bloodiest and most destructive conflict of all the ages from its remote causes to its glorious conclusion and beneficent results. The world-shaking rise of new democracies is set forth, and the enormous national and individual sacrifices producing that resurrection of human equality are detailed.

Two ideals have been before us in the preparation of this necessary work. These are simplicity and thoroughness. It is of no avail to describe the greatest of human events if the description is so confused that the reader loses interest. Thoroughness is an historical essential beyond price. So it is that official documents prepared in many instances upon the field of battle, and others taken from the files of the governments at war, are

the basis of this work. Maps and photographs of unusual clearness and high authenticity illuminate the text. All that has gone into war making, into the regeneration of the world, are herein set forth with historical particularity. The stark horrors of Belgium, the blighting terrors of chemical warfare, the governmental restrictions placed upon hundreds of millions of civilians, the war sacrifices falling upon all the civilized peoples of earth, are in these pages.

It is a work that mankind can well read and treasure.

# CONTENTS

## VOLUME I

### INTRODUCTION BY GENERAL MARCH

#### CHAPTER I. A WAR FOR INTERNATIONAL FREEDOM PAGE

A Conflict that was Inevitable—The Flower of Manhood on the Fields of France—Germany's Defiance to the World—Heroic Belgium—Four Autocratic Nations against Twenty-four Committed to the Principles of Liberty—America's Titanic Effort—Four Million Men Under Arms, Two Million Overseas—France the Martyr Nation—The British Empire's Tremendous Share in the Victory—A River of Blood Watering the Desert of Autocracy . . . . . 1

#### CHAPTER II. THE WORLD SUDDENLY TURNED UPSIDE DOWN

The War Storm Breaks—Trade and Commerce Paralyzed—Homeward Rush of Travelers—Stock Markets Closed—The Tide of Desolation Following in the Wake of War. . . 21

#### CHAPTER III. WHY THE WORLD WENT TO WAR

The Balkan Ferment—Russia, the Dying Giant Among Autocracies—Turkey the "Sick Man" of Europe—Scars Left by the Balkan War—Germany's Determination to Seize a Place in the Sun. . . . . 41

#### CHAPTER IV. THE PLOTTER BEHIND THE SCENE

The Assassination at Sarajevo—The Slavic Ferment—Austria's Domineering Note—The Plotters of Potsdam—The Mailed Fist of Militarism Beneath the Velvet Glove of Diplomacy—Mobilization and Declarations of War . . . 58

## CHAPTER V. THE GREAT WAR BEGINS PAGE

Germany Invades Belgium and Luxemburg—French Invade Alsace—England's "Contemptible Little Army" Lands in France and Belgium—The Murderous Gray-Green Tide—Heroic Retreat of the British from Mons—Belgium Overrun—Northern France Invaded—Marshal Joffre Makes Ready to Strike . . . . . 88

## CHAPTER VI. THE TRAIL OF THE BEAST IN BELGIUM

Barbarities that Shocked Humanity—Planned as Part of the Teutonic Policy of *Schrecklichkeit*—How the German and the Hun Became Synonymous Terms—The Unmatchable Crimes of a War-Mad Army—A Record of Infamy Written in Blood and Tears—Official Reports . . . . . 117

## CHAPTER VII. THE FIRST BATTLE OF THE MARNE

Joffre's Masterly Plan—The Enemy Trapped Between Verdun and Paris—Gallieni's "Army in Taxicabs"—Foch, the "Savior of Civilization," Appears—His Mighty Thrust Routs the Army of Hausen—Joffre Salutes Foch as "The First Strategist in Europe"—The Battle that Won the Baton of a Marshal . . . . . 153

## CHAPTER VIII. JAPAN IN THE WAR

Tsing Tau Seized by the Mikado—German "Gibraltar" of Far East Surrendered After Short Siege—Japan's Aid to the Allies in Money, Ships, Men and Nurses—German Propaganda in the Far East Fails . . . . . 170

## CHAPTER IX. CAMPAIGN IN THE EAST

Invasion of East Prussia—Von Hindenburg and Masurian Lakes—Battle of Tannenberg—Augustovo—Russians Capture Lemberg—The Offer to Poland . . . . . 184

## CHAPTER X. NEW METHODS AND HOR- RORS OF WARFARE

Tanks—Poison Gas—Flame Projectors—Airplane Bombs—Trench Mortars—Machine Guns—Modern Uses of Airplanes for Liaison and Attacks on Infantry—Radio—Rifle and Hand Grenades—A War of Intensive Artillery Preparation—A Debacle of Insanities, Terrible Wounds and Horrible Deaths . . . . . 212

# THE WORLD WAR

## CHAPTER I

### A WAR FOR INTERNATIONAL FREEDOM

**M**Y FELLOW COUNTRYMEN: The armistice was signed this morning. Everything for which America fought has been accomplished. The war thus comes to an end."

Speaking to the Congress and the people of the United States, President Wilson made this declaration on November 11, 1918. A few hours before he made this statement, Germany, the empire of blood and iron, had agreed to an armistice, terms of which were the hardest and most humiliating ever imposed upon a nation of the first class. It was the end of a war for which Germany had prepared for generations, a war bred of a philosophy that

Might can take its toll of earth's possessions, of human lives and liberties, when and where it will. That philosophy involved the cession to imperial Germany of the best years of young German manhood, the training of German youths to be killers of men. It involved the creation of a military caste, arrogant beyond all precedent, a caste that set its strength and pride against the righteousness of democracy, against the possession of wealth and bodily comforts, a caste that visualized itself as part of a power-mad Kaiser's assumption that he and God were to shape the destinies of earth.

When Marshal Foch, the foremost strategist in the world, representing the governments of the Allies and the United States, delivered to the emissaries of Germany terms upon which they might surrender, he brought to an end the bloodiest, the most destructive and the most beneficent war the world has known. It is worthy of note in this connection that the three great wars in which the United States of America engaged have been wars for freedom. The Revolutionary War was for the

KINGS AND CHIEF EXECUTIVES OF THE PRINCIPAL  
POWERS ASSOCIATED AGAINST THE GERMAN ALLIANCE

liberty of the colonies; the Civil War was waged for the freedom of manhood and for the principle of the indissolubility of the Union; the World War, beginning 1914, was fought for the right of small nations to self-government and for the right of every country to the free use of the high seas.

More than four million American men were under arms when the conflict ended. Of these, more than two million were upon the fields of France and Italy. These were thoroughly trained in the military art. They had proved their right to be considered among the most formidable soldiers the world has known. Against the brown rock of that host in khaki, the flower of German savagery and courage had broken at Château-Thierry. There the high tide of Prussian militarism, after what had seemed to be an irresistible dash for the destruction of France, spent itself in the bloody froth and spume of bitter defeat. There the Prussian Guard encountered the Marines, the Iron Division and the other heroic organizations of America's new army. There German

soldiers who had been hardened and trained under German conscription before the war, and who had learned new arts in their bloody trade, through their service in the World War, met their masters in young Americans taken from the shop, the field, and the forge, youths who had been sent into battle with a scant six months' intensive training in the art of war. Not only did these American soldiers hold the German onslaught where it was but, in a sudden, fierce, resistless counter-thrust they drove back in defeat and confusion the Prussian Guard, the Pommeranian Reserves, and smashed the morale of that German division beyond hope of resurrection.

The news of that exploit sped from the Alps to the North Sea Coast, through all the camps of the Allies, with incredible rapidity. "The Americans have held the Germans. They can fight," ran the message. New life came into the war-weary ranks of heroic poilus and into the steel-hard armies of Great Britain. "The Americans are as good as the best. There are millions of them, and millions more are com-

ing," was heard on every side. The transfusion of American blood came as magic tonic, and from that glorious day there was never a doubt as to the speedy defeat of Germany. From that day the German retreat dated. The armistice signed on November 11, 1918, was merely the period finishing the death sentence of German militarism, the first word of which was uttered at Château-Thierry.

Germany's defiance to the world, her determination to force her will and her "kultur" upon the democracies of earth, produced the conflict. She called to her aid three sister autocracies: Turkey, a land ruled by the whims of a long line of moody misanthropic monarchs; Bulgaria, the traitor nation cast by its Teutonic king into a war in which its people had no choice and little sympathy; Austria-Hungary, a congeries of races in which a Teutonic minority ruled with an iron scepter.

Against this phalanx of autocracy, twenty-four nations arrayed themselves. Populations of these twenty-eight warring nations far exceeded the total population of all the remain-

der of humanity. The conflagration of war literally belted the earth. It consumed the most civilized of capitals. It raged in the swamps and forests of Africa. To its call came alien peoples speaking words that none but themselves could translate, wearing garments of exotic cut and hue amid the smart garbs and sober hues of modern civilization. A twentieth century Babel came to the fields of France for freedom's sake, and there was born an internationalism making for the future understanding and peace of the world. The list of the twenty-eight nations entering the World War and their populations follow:

Countries	Population	Countries	Population
United States . . . .	110,000,000	Italy . . . . .	37,000,000
Austria-Hungary . .	50,000,000	Japan . . . . .	54,000,000
Belgium . . . . .	8,000,000	Liberia . . . . .	2,000,000
Bulgaria . . . . .	5,000,000	Montenegro . . . .	500,000
Brazil . . . . .	23,000,000	Nicaragua . . . . .	700,000
China . . . . .	420,000,000	Panama . . . . .	400,000
Costa Rica . . . . .	425,000	Portugal* . . . . .	15,000,000
Cuba . . . . .	2,500,000	Roumania . . . . .	7,500,000
France* . . . . .	90,000,000	Russia . . . . .	180,000,000
Guatemala . . . . .	2,000,000	San Marino . . . . .	10,000
Germany . . . . .	67,000,000	Serbia . . . . .	4,500,000
Great Britain* . . .	440,000,000	Siam . . . . .	6,000,000
Greece . . . . .	5,000,000	Turkey . . . . .	42,000,000
Haiti . . . . .	2,000,000		
Honduras . . . . .	600,000	Total . . . . .	1,575,135,000

\*Including colonies.

The following nations, with their populations, took no part in the World War:

Countries.	Population.	Countries.	Population.
Abyssinia .....	8,000,000	Norway .....	2,500,000
Afghanistan .....	6,000,000	Paraguay .....	800,000
Argentina .....	8,000,000	Peru .....	4,500,000
Bolivia .....	2,500,000	Persia .....	9,000,000
Chile .....	5,000,000	Salvador .....	1,250,000
Colombia .....	5,000,000	Spain .....	20,000,000
Denmark .....	3,000,000	Sweden .....	6,000,000
Dominican Rep....	710,000	Switzerland .....	3,750,000
Ecuador .....	1,500,000	Uruguay .....	1,250,000
Mexico .....	15,000,000	Venezuela .....	2,800,000
Nepal .....	4,000,000		
Holland* .....	40,000,000	Total .....	150,560,000

\*Including colonies.

Never before in the history of the world were so many races and peoples mingled in a military effort as those that came together under the command of Marshal Foch. If we divide the human races into white, yellow, red and black, all four were largely represented. Among the white races there were Frenchmen, Italians, Portuguese, English, Scottish, Welsh, Irish, Canadians, Australians, South Africans (of both British and Dutch descent), New Zealanders; in the American army, probably every other European nation was represented, with additional contingents from those already

named, so that every branch of the white race figured in the ethnological total.

There were representatives of many Asiatic races, including not only the volunteers from the native states of India, but elements from the French colony in Cochin China, with Annam, Cambodia, Tonkin, Laos, and Kwang Chau Wan. England and France both contributed many African tribes, including Arabs from Algeria and Tunis, Senegalese, Saharans, and many of the South African races. The red races of North America were represented in the armies of both Canada and the United States, while the Maoris, Samoans, and other Polynesian races were likewise represented. And as, in the American Army, there were men of German, Austrian, and Hungarian descent, and, in all probability, contingents also of Bulgarian and Turkish blood, it may be said that Foch commanded an army representing the whole human race, united in defense of the ideals of the Allies.

It will be seen that more than ten times the number of neutral persons were engulfed in

**TERRITORY OCCUPIED BY THE ALLIES UNDER THE  
ARMISTICE OF NOVEMBER 11, 1918**

Dotted area, invaded territory of Belgium, France, Luxembourg and Alsace-Lorraine to be evacuated in fourteen days; area in small squares, part of Germany west of the Rhine to be evacuated in twenty-five days and occupied by Allied and U. S. troops; lightly shaded area to east of Rhine, neutral zone; black semi-circles, bridge-heads of thirty kilometers radius in the neutral zone to be occupied by Allied armies.

the maelstrom of war. Millions of these suffered from it during the entire period of the conflict, four years three months and fifteen days, a total of 1,567 days. For almost four years Germany rolled up a record of victories on land and of piracies on and under the seas.

Little by little, day after day, piracies dwindled as the murderous submarine was mastered and its menace strangled. On the land, the Allies, under the matchless leadership of Marshal Ferdinand Foch and the generous co-operation of Americans, British, French and Italians, under the great Generals Pershing, Haig, Pétain and Diaz, wrested the initiative from von Hindenburg and Ludendorf, late in July, 1918. Then, in one hundred and fifteen days of wonderful strategy and the fiercest fighting the world has ever witnessed, Foch and the Allies closed upon the Germanic armies the jaws of a steel trap. A series of brilliant maneuvers dating from the battle of Château-Thierry in which the Americans checked the Teutonic rush, resulted in the defeat and rout on all the fronts of the Teutonic commands.

In that titanic effort, America's share was that of the final deciding factor. A nation unjustly titled the "Dollar Nation," believed by Germany and by other countries to be soft, selfish and wasteful, became over night hard as tempered steel, self-sacrificing with an altruism that inspired the world and thrifty beyond all precedent in order that not only its own armies but the armies of the Allies might be fed and munitioned.

Leading American thought and American action, President Wilson stood out as the prophet of the democracies of the world. Not only did he inspire America and the Allies to a military and naval effort beyond precedent, but he inspired the civilian populations of the world to extraordinary effort, efforts that eventually won the war. For the decision was gained quite as certainly on the wheat fields of Western America, in the shops and the mines and the homes of America as it was upon the battle-field.

This effort came in response to the following appeal by the President:

These, then, are the things we must do, and do well, besides fighting—the things without which mere fighting would be fruitless:

We must supply abundant food for ourselves and for our armies, and our seamen not only, but also for a large part of the nations with whom we have now made common cause, in whose support and by whose sides we shall be fighting;

We must supply ships by the hundreds out of our shipyards to carry to the other side of the sea, submarines or no submarines, what will every day be needed there; and—

Abundant materials out of our fields and our mines and our factories with which not only to clothe and equip our own forces on land and sea but also to clothe and support our people for whom the gallant fellows under arms can no longer work, to help clothe and equip the armies with which we are co-operating in Europe, and to keep the looms and manufactories there in raw material;

Coal to keep the fires going in ships at sea and in the furnaces of hundreds of factories across the sea;

Steel out of which to make arms and ammunition both here and there;

Rails for worn-out railways back of the fighting fronts;

Locomotives and rolling stock to take the place of those every day going to pieces;

Everything with which the people of England and France and Italy and Russia have usually supplied themselves, but cannot now afford the men, the materials, or the machinery to make.

I particularly appeal to the farmers of the South to plant abundant foodstuffs as well as cotton. They can show their patriotism in no better or more convincing way than by resisting the great temptation of the present price of cotton and helping, helping upon a large scale, to feed the nation and the peoples, everywhere who are fighting for their liberties and for our own. The variety of their crops will be the visible measure of their comprehension of their national duty.

The response was amazing in its enthusiastic and general compliance. No autocracy issuing a ukase could have been obeyed so explicitly. Not only did the various classes of workers and individuals observe the President's suggestions to the letter, but they yielded up individual right after right in order that the war work of the government might be expedited. Extraordinary powers and functions were granted by the people through Congress, and it was not until peace was declared that these rights and powers returned to the people.

These governmental activities ceased functioning after the war:

Food administration;

Fuel administration;

Espionage act;

War trade board;

Alien property custodian (with extension of time for certain duties);

Agricultural stimulation;

Housing construction (except for ship-builders);

Control of telegraphs and telephones;

Export control.

These functions were extended:

Control over railroads: to cease within twenty-one months after the proclamation of peace.

The War Finance Corporation: to cease to function six months after the war, with further time for liquidation.

The Capital Issues Committee: to terminate in six months after the peace proclamation.

The Aircraft Board: to end in six months after peace was proclaimed; and the government operation of ships, within five years after the war was officially ended.

### THE "TIGER OF FRANCE"

Georges Benjamin Eugene Clemenceau, world-famous Premier of France, who by his inspiring leadership maintained the magnificent morale of his countrymen in the face of the terrific assaults of the enemy.

President Wilson, generally acclaimed as the leader of the world's democracies, phrased for civilization the arguments against autocracy in the great peace conference after the war. The President headed the American delegation to that conclave of world reconstruction. With him as delegates to the conference were Robert Lansing, Secretary of State; Henry White, former Ambassador to France and Italy; Edward M. House and General Tasker H. Bliss.

Representing American Labor at the International Labor conference held in Paris simultaneously with the Peace Conference were Samuel Gompers, president of the American Federation of Labor; William Green, secretary-treasurer of the United Mine Workers of America; John R. Alpine, president of the Plumbers' Union; James Duncan, president of the International Association of Granite Cutters; Frank Duffy, president of the United Brotherhood of Carpenters and Joiners, and Frank Morrison, secretary of the American Federation of Labor.

Estimating the share of each Allied nation in the great victory, mankind will conclude that the heaviest cost in proportion to pre-war population and treasure was paid by the nations that first felt the shock of war, Belgium, Serbia, Poland and France. All four were the battle-grounds of huge armies, oscillating in a bloody frenzy over once fertile fields and once prosperous towns.

Belgium, with a population of 8,000,000, had a casualty list of more than 90,000; France, with its casualties of 4,506,500 out of a population (including its colonies) of 90,000,000, is really the martyr nation of the world. Her gallant poilus showed the world how cheerfully men may die in defense of home and liberty. Huge Russia, including hapless Poland, had a casualty list of 9,150,000 out of its entire population of 180,000,000. The United States out of a population of 110,000,000 had a casualty list of 274,659 for nineteen months of war; of these 67,813 were killed or died of disease; 192,483 were wounded; and 14,363 prisoners or missing.

To the glory of Great Britain must be recorded the enormous effort made by its people, showing through operations of its army and navy. The British Empire, including the Colonies, had a casualty list of 3,089,757 men out of a total population of 440,000,000. Of these 692,065 were killed; 2,037,325 were wounded, and 360,367 were reported missing. It raised an army of 7,000,000, and fought seven separate foreign campaigns, in France, Italy, Dardanelles, Mesopotamia, Macedonia, East Africa and Egypt. It raised its navy personnel from 115,000 to 450,000 men. Co-operating with its allies on the sea, it destroyed approximately one hundred and fifty German and Austrian submarines. It aided materially the American navy and transport service in sending overseas the great American army whose coming decided the war. The British navy and transport service during the war made the following record of transportation and convoy:

Twenty million men, 2,000,000 horses, 130,000,000 tons of food, 25,000,000 tons of ex-

plosives and supplies, 51,000,000 tons of oil and fuels, 500,000 vehicles. In 1917 alone 7,000,000 men, 500,000 animals, 200,000 vehicles and 9,500,000 tons of stores were conveyed to the several war fronts.

The German losses were estimated at 1,611,104 killed or died of disease; 3,683,143 wounded; and 772,522 prisoners and missing.

A tabulation of the estimates of casualties and the money cost of the war reveals the enormous price paid by humanity to convince a military-mad Germanic caste that Right and not Might must hereafter rule the world. Following is the tabulation:

Name	Mobilized	Dead	Wounded	Prisoners or Missing	Total Casualties
United States..	4,272,521	67,813	192,483	14,233	274,659
British Empire.	7,500,000	692,065	2,037,325	360,367	3,089,757
France .....	7,500,000	1,385,300	2,675,000	446,300	4,506,600

Russia .....\$30,000,000,000	Germany .....\$45,000,000,000
Britain ..... 52,000,000,000	Austria-
France ..... 32,000,000,000	Hungary ... 25,000,000,000
United States. 40,000,000,000	Turkey ..... 5,000,000,000
Italy ..... 12,000,000,000	Bulgaria ..... 2,000,000,000
Roumania .... 3,000,000,000	
Serbia ..... 3,000,000,000	Total .....\$77,000,000,000
Total .....\$172,000,000,000	

Grand total of estimated cost in money, \$249,000,000,000.

Was the cost too heavy? Was the price of international liberty paid in human lives and in sacrifices untold too great for the peace that followed?

Even the most practical of money changers, the most sentimental pacifist, viewing the cost

in connection with the liberation of whole nations, with the spread of enlightened liberty through oppressed and benighted lands, with the destruction of autocracy, of the military caste, and of Teutonic kultur in its materialistic aspect, must agree that the blood was well shed, the treasure well spent.

Millions of gallant, eager youths learned how to die fearlessly and gloriously. They died to teach vandal nations that nevermore will humanity permit the exploitation of peoples for militaristic purposes.

As Milton, the great philosopher poet, phrased the lesson taught to Germany on the fields of France:

They err who count it glorious to subdue  
By conquest far and wide, to overrun  
Large countries, and in field great battles win,  
Great cities by assault; what do these worthies  
But rob and spoil, burn, slaughter, and enslave  
Peaceable nations, neighboring or remote  
Made captive, yet deserving freedom more  
Than those their conquerors, who leave behind  
Nothing but ruin wheresoe'er they rove  
And all the flourishing works of peace destroy.

## CHAPTER II

### THE WORLD SUDDENLY TURNED UPSIDE DOWN

DEMORALIZATION, like the black plague of the middle ages, spread in every direction immediately following the first overt acts of war. Men who were millionaires at nightfall awoke the next morning to find themselves bankrupt through depreciation of their stock-holdings. Prosperous firms of importers were put out of business. International commerce was dislocated to an extent unprecedented in history.

The greatest of hardships immediately following the war, however, were visited upon those who unhappily were caught on their vacations or on their business trips within the area affected by the war. Not only men, but women and children, were subjected to privations of the severest character. Notes which

had been negotiable, paper money of every description, and even silver currency suddenly became of little value. Americans living in hotels and pensions facing this sudden shrinkage in their money, were compelled to leave the roofs that had sheltered them. That which was true of Americans was true of all other nationalities, so that every embassy and the office of every consul became a miniature Babel of excited, distressed humanity.

The sudden seizure of railroads for war purposes in Germany, France, Austria and Russia, cut off thousands of travelers in villages that were almost inaccessible. Europeans being comparatively close to their homes, were not in straits as severe as the Americans whose only hope for aid lay in the speedy arrival of American gold. Prices of food soared beyond all precedent and many of these hapless strangers went under. Paris, the brightest and gayest city in Europe, suddenly became the most sombre of dwelling places. No traffic was permitted on the highways at night. No lights were permitted and all the cafés were

closed at eight o'clock. The gay capital was placed under iron military rule.

Seaports, and especially the pleasure resorts in France, Belgium and England, were placed under a military supervision. Visitors were ordered to return to their homes and every resort was shrouded with darkness at night. The records of those early days are filled with stories of dramatic happenings.

On the night of July 31st Jean Leon Jaurès, the famous leader of French Socialists, was assassinated while dining in a small restaurant near the Paris Bourse. His assassin was Raoul Villein. Jaurès had been endeavoring to accomplish a union of French and German Socialists with the aim of preventing the war. The object of the assassination appeared to have been wholly political.

On the same day stock exchanges throughout the United States were closed, following the example of European stock exchanges. Ship insurance soared to prohibitive figures. Reservists of the French and German armies living outside of their native land were called

to the colors and their homeward rush still further complicated transportation for civilians. All the countries of Europe clamored for gold. North and South America complied with the demand by sending cargoes of the precious metal overseas. The German ship *Kron Prinzessin* with a cargo of gold, attempted to make the voyage to Hamburg, but a wireless warning that Allied cruisers were waiting for it off the Grand Banks of Newfoundland, compelled the big ship to turn back to safety in America.

Channel boats bearing American refugees from the Continent to London were described as floating hells. London was excited over the war and holiday spirit, and overrun with five thousand citizens of the United States tearfully pleading with the American Ambassador for money for transportation home or assurances of personal safety.

The condition of the terror-stricken tourists fleeing to the friendly shores of England from Continental countries crowded with soldiers dragging in their wake heavy guns, resulted

WHERE THE WORLD WAR BEGAN

in an extraordinary gathering of two thousand Americans at a hotel one afternoon and the formation of a preliminary organization to afford relief. Some people who attended the meeting were already beginning to feel the pinch of want with little prospects of immediate succor. One man and wife, with four children, had six cents when he appealed to Ambassador Page after an exciting escape from German territory.

Oscar Straus, worth ten millions, struck London with nine dollars. Although he had letters of credit for five thousand, he was unable to cash them in Vienna. Women hugging newspaper bundles containing expensive Paris frocks and millinery were herded in third-class carriages and compelled to stand many hours. They reached London utterly fatigued and unkempt, but mainly cheerful, only to find the hotels choked with fellow countrymen fortunate to reach there sooner.

The Ambassador was harassed by anxious women and children who asked many absurd questions which he could not answer. He said:

“The appeals of these people are most distressing. They are very much excited, and no small wonder. I regret I have no definite news of the prospects or plans of the government for relief. I have communicated their condition to the Department of State and expect a response and assurances of coming aid as soon as possible. That the government will act I have not the slightest doubt. I am confident that Washington will do everything in her power for relief. How soon, I cannot tell. I have heard many distressing tales during the last forty-eight hours.”

A crowd filled the Ambassador's office on the first floor of the flat building, in Victoria Street, which was mainly composed of women, school teachers, art students, and other persons doing Europe on a shoestring. Many were entirely out of money and with limited securities, which were not negotiable.

The action of the British Government extending the bank holiday till Thursday of that week was discouraging news for the new arrivals from the Continent, as it was uncertain

whether the express and steamship companies would open in the morning for the cashing of checks and the delivery of mail, as was announced the previous Saturday.

Doctors J. Riddle Goffe, of New York; Frank F. Simpson, of Pittsburgh; Arthur D. Ballou of Vistaburg, Mich., and B. F. Martin, of Chicago, formed themselves into a committee, and asked the co-operation of the press in America to bring about adequate assistance for the marooned Americans, and to urge the bankers of the United States to insist on their letters of credit and travelers' checks being honored so far as possible by the agents in Europe upon whom they were drawn.

Dr. Martin and Dr. Simpson, who left London on Saturday for Switzerland to fetch back a young American girl, were unable to get beyond Paris, and they returned to London. Everywhere they found trains packed with refugees whose only object in life apparently was to reach the channel boats, accepting cheerfully the discomforts of those vessels if only able to get out of the war.

Rev. J. P. Garfield, of Claremore, N. H., gave the following account of his experiences in Holland:

"On sailing from the Hook of Holland near midnight we pulled out just as the boat train from The Hague arrived. The steamer paused, but as she was filled to her capacity she later continued on her voyage, leaving fully two hundred persons marooned on the wharf.

"Our discomforts while crossing the North Sea were great. Every seat was filled with sleepers, the cabins were given to women and children. The crowd, as a rule, was helpful and kindly, the single men carrying the babies and people lending money to those without funds. Despite the refugee conditions prevailing it was noticeable that many women on the Hook wharf clung tenaciously to band boxes containing Parisian hats."

Travelers from Cologne said that searchlights were operated from the tops of the hotels all night searching for airplanes, and machine guns were mounted on the famous Cologne Cathedral. They also reported that

tourists were refused hotel accommodations at Frankfort because they were without cash.

Men, women and children sat in the streets all night. The trains were stopped several miles from the German frontier and the passengers, especially the women and children, suffered great hardships being forced to continue their journey on foot.

Passengers arriving at London from Montreal on the Cunard Line steamer *Andania*, bound for Southampton, reported the vessel was met at sea by a British torpedo boat and ordered by wireless to stop. The liner then was led into Plymouth as a matter of precaution against mines. Plymouth was filled with soldiers, and searchlights were seen constantly flashing about the harbor.

Otis B. Kent, an attorney for the Interstate Commerce Commission, of Washington, arrived in London after an exciting journey from Petrograd. Unable to find accommodations at a hotel he slept on the railway station floor. He said:

“I had been on a trip to Sweden to see the

midnight sun. I did not realize the gravity of the situation until I saw the Russian fleet cleared for action. This was only July 26th, at Kronstadt, where the shipyards were working overtime.

"I arrived at the Russian capital on the following day. Enormous demonstrations were taking place. I was warned to get out and left on the night of the 28th for Berlin. I saw Russian soldiers drilling at the stations and artillery constantly on the move.

"At Berlin I was warned to keep off the streets for fear of being mistaken for an Englishman. At Hamburg the number of warnings was increased. Two Russians who refused to rise in a café when the German anthem was played were attacked and badly beaten. I also saw two Englishmen attacked in the street, but they finally were rescued by the police.

"There was a harrowing scene when the Hamburg-American Line steamer *Imperator* canceled its sailing. She left stranded three thousand passengers, most of them short of money, and the women wailing. About one

hundred and fifty of us were given passage in the second class of the American Line steamship Philadelphia, for which I was offered \$400 by a speculator.

“The journey to Flushing was made in a packed train, its occupants lacking sleep and food. No trouble was encountered on the frontier.”

Theodore Hetzler, of the Fifth Avenue Bank, was appointed chairman of the meeting for preliminary relief of the stranded tourists, and committees were named to interview officials of the steamship companies and of the hotels, to search for lost baggage, to make arrangements for the honoring of all proper checks and notes, and to confer with the members of the American embassy.

Oscar Straus, who arrived from Paris, said that the United States embassy there was working hard to get Americans out of France. Great enthusiasm prevailed at the French capital, he said, owing to the announcement that the United States Government was consider-

ing a plan to send transports to take Americans home.

The following committees were appointed at the meeting:

Finance—Theodore Hetzler, Fred I. Kent and James G. Cannon; Transportation—Joseph F. Day, Francis M. Weld and George D. Smith, all of New York; Diplomatic—Oscar S. Straus, Walter L. Fisher and James Byrne; Hotels—L. H. Armour, of Chicago, and Thomas J. Shanley, New York.

The committee established headquarters where Americans might register and obtain assistance. Chandler Anderson, a member of the International Claims Commission, arrived in London from Paris. He said he had been engaged with the work of the commission at Versailles, when he was warned by the American embassy that he had better leave France. He acted promptly on this advice and the commission was adjourned until after the war. Mr. Anderson had to leave his baggage behind him because the railway company would not

register it. He said the city of Paris presented a strange contrast to the ordinary animation prevailing there. Most of the shops were closed. There were no taxis in the streets, and only a few vehicles drawn by horses.

The armored cruiser Tennessee, converted for the time being into a treasure ship, left New York on the night of August 6th, 1914, to carry \$7,500,000 in gold to the many thousand Americans who were in want in European countries. Included in the \$7,500,000 was \$2,500,000 appropriated by the government. Private consignments in gold in sums from \$1,000 to \$5,000 were accepted by Colonel Smith, of the army quartermaster's department, who undertook their delivery to Americans in Paris and other European ports.

The cruiser carried as passengers Ambassador Willard, who returned to his post at Madrid, and army and naval officers assigned as military observers in Europe. On the return trip accommodations for 200 Americans were available.

The dreadnaught Florida, after being hastily

coaled and provisioned, left the Brooklyn Navy Yard under sealed orders at 9.30 o'clock the morning of August 6th and proceeded to Tompkinsville, where she dropped anchor near the Tennessee

The Florida was sent to protect the neutrality of American ports and prohibit supplies to belligerent ships. Secretary Daniels ordered her to watch the port of New York and sent the Mayflower to Hampton Roads. Destroyers guarded ports along the New England coast and those at Lewes, Del., to prevent violations of neutrality at Philadelphia and in that territory. Any vessel that attempted to sail for a belligerent port without clearance papers was boarded by American officials.

The Texas and Louisiana, at Vera Cruz, and the Minnesota, at Tampico, were ordered to New York, and Secretary Daniels announced that other American vessels would be ordered north as fast as room could be found for them in navy yard docks.

At wireless stations, under the censorship ordered by the President, no code messages

were allowed in any circumstances. Messages which might help any of the belligerents in any way were barred.

The torpedo-boat destroyer Warrington and the revenue cutter Androscoggin arrived at Bar Harbor on August 6th, to enforce neutrality regulations and allowed no foreign ships to leave Frenchman's Bay without clearance papers. The United States cruiser Milwaukee sailed the same day from the Puget Sound Navy Yard to form part of the coast patrol to enforce neutrality regulations.

Arrangements were made in Paris by Myron T. Herrick, the American Ambassador, acting under instructions from Washington, to take over the affairs of the German embassy, while Alexander H. Thackara, the American Consul General, looked after the affairs of the German consulate.

President Poincaré and the members of the French cabinet later issued a joint proclamation to the French nation in which was the phrase "mobilization is not war."

The marching of the soldiers in the streets

**THE RIGHT HONORABLE DAVID LLOYD GEORGE**

British Premier, who headed the coalition cabinet which carried England through the war to victory.

with the English, Russian and French flags flying, the singing of patriotic songs and the shouting of "On to Berlin!" were much less remarkable than the general demeanor and cold resolution of most of the people.

The response to the order of mobilization was instant, and the stations of all the railways, particularly those leading to the eastward, were crowded with reservists. Many women accompanied the men until close to the stations, where, softly crying, farewells were said. The troop trains left at frequent intervals. All the automobile busses disappeared, having been requisitioned by the army to carry meat, the coachwork of the vehicles being removed and replaced with specially designed bodies. A large number of taxicabs, private automobiles and horses and carts also were taken over by the military for transport purposes.

The wildest enthusiasm was manifested on the boulevards when the news of the ordering of the mobilization became known. Bodies of men formed into regular companies in ranks ten deep, paraded the streets waving the tri-

color and other national emblems and cheering and singing the "Marseillaise" and the "Internationale," at the same time throwing their hats in the air. On the sidewalks were many weeping women and children. All the stores and cafés were deserted.

All foreigners were compelled to leave Paris or France before the end of the first day of mobilization by train but not by automobile. Time tables were posted on the walls of Paris giving the times of certain trains on which these people might leave the city.

American citizens or British subjects were allowed to remain in France, except in the regions on the eastern frontier and near certain fortresses, provided they made declaration to the police and obtained a special permit.

As to Italy's situation, Rome was quite calm and the normal aspect made tourists decide that Italy was the safest place. Austria's note to Serbia was issued without consulting Italy. One point of the Triple Alliance provided that no member should take action in the Balkans

before an agreement with the other allies. Such an agreement did not take place. The alliance was of defensive, not aggressive, character and could not force an ally to follow any enterprise taken on the sole account and without a notice, as such action taken by Austria against Serbia. It was felt even then that Italy would eventually cast its lot with the Entente Allies.

Secretary of the Treasury William G. McAdoo; John Skelton Williams, Comptroller of the Currency; Charles S. Hamblin and William P. G. Harding, members of the Federal Reserve Board, went to New York early in August, 1914, where they discussed relief measures with a group of leading bankers at what was regarded as the most momentous conference of the kind held in the country in recent years.

The New York Clearing House Committee, on August 2d, called a meeting of the Clearing House Association, to arrange for the immediate issuance of clearing house cer-

tificates. Among those at the conference were J. P. Morgan and his partner, Henry P. Davison; Frank A. Vanderlip, president of the National City Bank, and A. Barton Hepburn, chairman of the Chase National Bank.

## CHAPTER III

### WHY THE WORLD WENT TO WAR

WHILE it is true that the war was conceived in Berlin, it is none the less true that it was born in the Balkans. It is necessary in order that we may view with correct perspective the background of the World War, that we gain some notion of the Balkan States and the complications entering into their relations. These countries have been the adopted children of the great European powers during generations of rulers. Russia assumed guardianship of the nations having a preponderance of Slavic blood; Roumania with its Latin consanguinities was close to France and Italy; Bulgaria, Greece, and Balkan Turkey were debatable regions wherein the diplomats of the rival nations secured temporary victories by devious methods.

The Balkans have fierce hatreds and have been the site of sudden historic wars. At the time of the declaration of the World War, the Balkan nations were living under the provisions of the Treaty of Bucharest, dated August 10, 1913. Greece, Roumania, Bulgaria, Serbia and Montenegro were signers, and Turkey acquiesced in its provisions.

The assassination at Sarajevo had sent a convulsive shudder throughout the Balkans. The reason lay in the century-old antagonism between the Slav and the Teuton. Serbia, Montenegro and Russia had never forgiven Austria for seizing Bosnia and Herzegovina and making these Slavic people subjects of the Austrian crown. Bulgaria, Roumania and Turkey remained cold at the news of the assassination. German diplomacy was in the ascendant at these courts and the prospect of war with Germany as their great ally presented no terrors for them. The sympathies of the people of Greece were with Serbia, but the Grecian Court, because the Queen of Greece was the only sister of the German Kaiser, was

whole heartedly with Austria. Perhaps at the first the Roumanians were most nearly neutral. They believed strongly that each of the small nations of the Balkan region as well as all of the small nations that had been absorbed but had not been digested by Austria, should cut itself from the leading strings held by the large European powers. There was a distinct undercurrent for a federation resembling that of the United States of America between these peoples. This was expressed most clearly by M. Jonsco, leader of the Liberal party of Roumania and generally recognized as the ablest statesman of middle Europe. He declared:

“I always believed, and still believe, that the Balkan States cannot secure their future otherwise than by a close understanding among themselves, whether this understanding shall or shall not take the form of a federation. No one of the Balkan States is strong enough to resist the pressure from one or another of the European powers.

“For this reason I am deeply grieved to see

© Underwood and Underwood, N. Y.

**FRANCIS JOSEPH I OF AUSTRIA, THE "OLD EMPEROR," ON A STATE OCCASION**

Francis Joseph died before the war had settled the fate of the Hapsburgs. He lived to see the further expansion, but quickly disintegrated, and has only seen a shadow with year of his reign. His life was tragic. He lived to see the further expansion, but quickly disintegrated, and has only seen a shadow with always before him the specter of the disintegration of his many-raced empire.

in the Balkan coalition of 1912 Roumania not invited. If Roumania had taken part in the first one, we should not have had the second. I did all that was in my power and succeeded in preventing the war between Roumania and the Balkan League in the winter of 1912-13.

"I risked my popularity, and I do not feel sorry for it. I employed all my efforts to prevent the second Balkan war, which, as is well known, was profitable to us. I repeatedly told the Bulgarians that they ought not to enter it because in that case we would enter it too. But I was not successful in my efforts.

"During the second Balkan war I did all in my power to end it as quickly as possible. At the conference at Bucharest I made efforts, as Mr. Pashich and Mr. Venizelos know very well, to secure for beaten Bulgaria the best terms. My object was to obtain a new coalition of all the Balkan States, including Roumania. Had I succeeded in this the situation would be much better. No reasonable man will deny that the Balkan States are neutralizing each other at the present time, which in

itself makes the whole situation all the more miserable.

“In October, 1913, when I succeeded in facilitating the conclusion of peace between Greece and Turkey, I was pursuing the same object of the Balkan coalition. On my return from Athens I endeavored, though without success, to put the Greco-Turkish relations on a basis of friendship, being convinced that the well-understood interest of both countries lies not only in friendly relations, but even in an alliance between them.

“The dissensions that exist between the Balkan States can be settled in a friendly way without war. The best moment for this would be after the general war, when the map of Europe will be remade. The Balkan country which would start war against another Balkan country would commit, not only a crime against her own future, but an act of folly as well.

“The destiny and future of the Balkan States, and of all the small European peoples as well, will not be regulated by fratricidal wars, but, with this great European struggle,

the real object of which is to settle the question whether Europe shall enter an era of justice, and therefore happiness for the small peoples, or whether we will face a period of oppression more or less guilt-edged. And as I always believed that wisdom and truth will triumph in the end, I want to believe, too, that, in spite of the pessimistic news reaching me from the different sides of the Balkan countries, there will be no war among them in order to justify those who do not believe in the vitality of the small peoples."

The conference at Rome, April 10, 1918, to settle outstanding questions between the Italians and the Slavs of the Adriatic, drew attention to those Slavonic peoples in Europe who were under non-Slavonic rule. At the beginning of the war there were three great Slavonic groups in Europe: First, the Russians with the Little Russians, speaking languages not more different than the dialect of Yorkshire is from the dialect of Devonshire; second, a central group, including the Poles, the Czechs or Bohemians, the Moravians, and

Slovaks, this group thus being separated under the four crowns of Russia, Germany, Austria and Hungary; the third, the southern group, included the Slavonians, the Croatians, the Dalmatians, Bosnians, Herzegovinians, the Slavs, generally called Slovenes, in the western part of Austria, down to Goritzia, and also the two independent kingdoms of Montenegro and Serbia.

Like the central group, this southern group of Slavs was divided under four crowns, Hungary, Austria, Montenegro, and Serbia; but, in spite of the fact that half belong to the Western and half to the Eastern Church, they are all essentially the same people, though with considerable infusion of non-Slavonic blood, there being a good deal of Turkish blood in Bosnia and Herzegovina. The languages, however, are practically identical, formed largely of pure Slavonic materials, and, curiously, much more closely connected with the eastern Slav group—Russia and Little Russia—than with the central group, Polish and Bohemian. A Russian of Moscow will find it

much easier to understand a Slovene from Goritzia than a Pole from Warsaw. The Ruthenians, in southern Galicia and Bukowina, are identical in race and speech with the Little Russians of Ukrainia.

Of the central group, the Poles have generally inclined to Austria, which has always supported the Polish landlords of Galicia against the Ruthenian peasantry; while the Czechs have been not so much anti-Austrian as anti-German. Indeed, the Hapsburg rulers have again and again played these Slavs off against their German subjects. It was the Southern Slav question as affecting Serbia and Austria, that gave the pretext for the present war. The central Slav question affecting the destiny of the Poles—was a bone of contention between Austria and Germany. It is the custom to call the Southern Slavs “Jugoslavs” from the Slav word Yugo, “south,” but as this is a concession to German transliteration many prefer to write the word “Yugoslav,” which represents its pronunciation. The South Slav question was created by the incursions of three Asiatic

peoples—Huns, Magyars, Turks—who broke up the originally continuous Slav territory that ran from the White Sea to the confines of Greece and the Adriatic.

THE MIXTURE OF RACES IN SOUTH CENTRAL EUROPE

This was the complex of nationalities, the ferment of races existing in 1914. Out of the hatreds engendered by the domination over the liberty-loving Slavic peoples by an arrogant Teutonic minority grew the assassinations at Sarajevo. These crimes were the expression of hatred not for the heir apparent of

Austria but for the Hapsburgs and their Germanic associates.

By a twist of the wheel of fate, the same Slavic peoples whose determination to rid themselves of the Teutonic yoke, started the war, also bore rather more than their share in the swift-moving events that decided and closed the war.

Russia, the dying giant among the great nations, championed the Slavic peoples at the beginning of the war. It entered the conflict in aid of little Serbia, but at the end Russia bowed to Germany in the infamous peace treaty at Brest-Litovsk. Thereafter during the last months of the war Russia was virtually an ally of its ancient enemy, Turkey, the "Sick Man of Europe," and the central German empires. With these allies the Bolshevik government of Russia attempted to head off the Czecho-Slovak regiments that had been captured by Russia during its drive into Austria and had been imprisoned in Siberia. After the peace consummated at Brest-Litovsk, these regiments determined to fight on the side of the

Allies and endeavored to make their way to the western front.

No war problems were more difficult than those of the Czecho-Slovaks. Few have been handled so masterfully. Surrounded by powerful enemies which for centuries have been bent on destroying every trace of Slavic culture, they had learned how to defend themselves against every trick or scheme of the brutal Germans.

The Czecho-Slovak plan in Russia was of great value to the Allies all over the world, and was put at their service by Professor Thomas G. Masaryk. He went to Russia when everything was adrift and got hold of Bohemian prisoners here and there and organized them into a compact little army of 50,000 to 60,000 men. Equipped and fed, he moved them to whatever point had most power to thoroughly disrupt the German plans. They did much to check the German army for months. They resolutely refused to take any part in Russian political affairs, and when it seemed no longer possible to work effectively in Russia, this re-

markable little band started on a journey all round the world to get to the western front. They loyally gave up most of their arms under agreement with Lenine and Trotzky that they might peacefully proceed out of Russia via Vladivostok.

While they were carrying out their part of the agreement, and well on the way, they were surprised by telegrams from Lenine and Trotzky to the Soviets in Siberia ordering them to take away their arms and intern them.

The story of what occurred then was told by two American engineers, Emerson and Hawkins, who, on the way to Ambassador Francis, and not being able to reach Bologda, joined a band of four or five thousand. The engineers were with them three months, while they were making it safe along the lines of the railroad for the rest of the Czecho-Slovaks to get out, and incidentally for Siberians to resume peaceful occupations. They were also supported by old railway organizations which had stuck bravely to them without wages and which every little while were "shot up" by the Bolsheviki.

Distress in Russia would have been much more intense had it not been for the loyalty of the railway men in sticking to their tasks. Some American engineers at Irkutsk, on a peaceful journey, out of Russia, on descending from the cars were met with a demand to surrender, and shots from machine guns. Some, fortunately, had kept hand grenades, and with these and a few rifles went straight at the machine guns. Although outnumbered, the attackers took the guns and soon afterward took the town. The Czecho-Slovaks, in the beginning almost unarmed, went against great odds and won for themselves the right to be considered a nation.

Seeing the treachery of Lenine and Trotsky, they went back toward the west and made things secure for their men left behind. They took town after town with the arms they first took away from the Bolsheviki and Germans; but in every town they immediately set up a government, with all the elements of normal life. They established police and sanitary systems, opened hospitals, and had roads re-

paired, leaving a handful of men in the midst of enemies to carry on the plans of their leaders. American engineers speaking of the cleanliness of the Czecho-Slovak army, said that they lived like Spartans.

The whole story is a remarkable evidence of the struggle of these little people for self-government.

The emergence of the Czecho-Slovak nation has been one of the most remarkable and noteworthy features of the war. Out of the confusion of the situation, with the possibility of the resurrection of oppressed peoples, something of the dignity of old Bohemia was comprehended, and it was recognized that the Czechs were to be rescued from Austria and the Slovaks from Hungary, and united in one country with entire independence. This was undoubtedly due, in large measure, to the activities of Professor Masaryk, the president of the National Executive Council of the Czecho-Slovaks. His four-year exile in the United States had the establishment of the new nation as its fruit.

Professor Masaryk called attention to the fact that there is a peculiar discrepancy between the number of states in Europe and the number of nationalities—twenty-seven states to seventy nationalities. He explained, also, that almost all the states are mixed, from the point of nationality. From the west of Europe to the east, this is found to be true, and the farther east one goes the more mixed do the states become. Austria is the most mixed of all the states. There is no Austrian language, but there are nine languages, and six smaller nations or remnants of nations. In all of Germany there are eight nationalities besides the Germans, who have been independent, and who have their own literature. Turkey is an anomaly, a combination of various nations overthrown and kept down.

Since the eighteenth century there has been a continuing strong movement from each nation to have its own state. Because of the mixed peoples, there is much confusion. There are Roumanians in Austria, but there is a kingdom of Roumania. There are Southern Slavs,

but there are also Serbia and Montenegro. It is natural that the Southern Slavs should want to be united as one state. So it is with Italy.

There was no justice in Poland being separated in three parts to serve the dynasties of Prussia, Russia and Austria. The Czecho-Slovaks of Austria and Hungary claimed a union. The national union consists in an endeavor to make the suppressed nations free, to unite them in their own states, and to readjust the states that exist; to force Austria and Prussia to give up the states that should be free.

In the future, said Doctor Masaryk, there are to be sharp ethnological boundaries. The Czecho-Slovaks will guarantee the minorities absolute equality, but they will keep the German part of their country, because there are many Bohemians in it, and they do not trust the Germans.

## CHAPTER IV

### THE PLOTTER BEHIND THE SCENE

ONE factor alone caused the great war. It was not the assassination at Sarajevo, not the Slavic ferment of anti-Teutonism in Austria and the Balkans. The only cause of the world's greatest war was the determination of the German High Command and the powerful circle surrounding it that "*Der Tag*" had arrived. The assassination at Sarajevo was only the peg for the pendant of war. Another peg would have been found inevitably had not the projection of that assassination presented itself as the excuse.

Germany's military machine was ready. A gray-green uniform that at a distance would fade into misty obscurity had been devised after exhaustive experiments by optical, dye and cloth experts co-operating with the military high command. These uniforms had been

standardized and fitted for the millions of men enrolled in Germany's regular and reserve armies. Rifles, great pyramids of munitions, field kitchens, traveling post-offices, motor lorries, a network of military railways leading to the French and Belgian border, all these and more had been made ready. German soldiers had received instructions which enabled each man at a signal to go to an appointed place where he found everything in readiness for his long forced marches into the territory of Germany's neighbors.

More than all this, Germany's spy system, the most elaborate and unscrupulous in the history of mankind, had enabled the German High Command to construct in advance of the declaration of war concrete gun emplacements in Belgium and other invaded territory. The cellars of dwellings and shops rented or owned by German spies were camouflaged concrete foundations for the great guns of Austria and Germany. These emplacements were in exactly the right position for use against the fortresses of Germany's foes. Advertisements

and shop-signs were used by spies as guides for the marching German armies of invasion.

In brief, Germany had planned for war.

GERMANY'S POSSESSIONS IN AFRICA PRIOR TO 1914

She was approximately ready for it. Under the shelter of such high-sounding phrases as "We demand our place in the sun," and "The seas must be free," the German people were

educated into the belief that the hour of Germany's destiny was at hand.

German psychologists, like other German scientists, had co-operated with the imperial militaristic government for many years to bring the Germanic mind into a condition of docility. So well did they understand the mentality and the trends of character of the German people that it was comparatively easy to impose upon them a militaristic system and philosophy by which the individual yielded countless personal liberties for the alleged good of the state. Rigorous and compulsory military service, unquestioning adherence to the doctrine that might makes right and a cession to "the All-Highest," as the Emperor was styled, of supreme powers in the state, are some of the sufferances to which the German people submitted.

German propaganda abroad was quite as vigorous as at home, but infinitely less successful. The German High Command did not expect England to enter the war. It counted upon America's neutrality with a leaning to-

ward Germany. It believed that German colonization in South Africa and South America would incline these vast domains toward friendship for the Central Empire. How mistaken the propagandists and psychologists were events have demonstrated.

It was this dream of world-domination by Teutonic kultur that supplied the motive leading to the world's greatest war. Bosnia, an unwilling province of Austria-Hungary, at one time a province of Serbia and overwhelmingly Slavic in its population, had been seething for years with an anti-Teutonic ferment. The Teutonic court at Vienna, leading the minority Germanic party in Austria-Hungary, had been endeavoring to allay the agitation among the Bosnian Slavs. In pursuance of that policy, Archduke Francis Ferdinand, heir-presumptive to the thrones of Austria and Hungary, and his morganatic wife, Sophia Chotek, Duchess of Hohenberg, on June 28, 1914, visited Sarajevo, the capital of Bosnia. On the morning of that day, while they were being driven through the narrow streets of the an-

cient town, a bomb was thrown at them, but they were uninjured. They were driven through the streets again in the afternoon, for purpose of public display. A student, just out of his 'teens, one Gavrilo Prinzep, attacked the royal party with a magazine pistol and killed both the Archduke and his wife.

Here was the excuse for which Germany had waited. Here was the dawn of "The Day." The Germanic court of Austria asserted that the crime was the result of a conspiracy, leading directly to the Slavic court of Serbia. The Serbians in their turn declared that they knew nothing of the assassination. They pointed out the fact that Sophia Chotek was a Slav, and that Francis Ferdinand was more liberal than any other member of the Austrian royal household, and finally, that he, more than any other member of the Austrian court, understood and respected the Slavic character and aspirations.

At six o'clock on the evening of July 23d, Austria sent an ultimatum to Serbia, presenting eleven demands and stipulating that categorical replies must be delivered before six

o'clock on the evening of July 25th. Although the language in which the ultimatum was couched was humiliating to Serbia, the answer was duly delivered within the stipulated time.

The demands of the Austrian note in brief were as follows:

1. The Serbian Government to give formal assurance of its condemnation of Serb propaganda against Austria.

2. The next issue of the Serbian "Official Journal" was to contain a declaration to that effect.

3. This declaration to express regret that Serbian officers had taken part in the propaganda.

4. The Serbian Government to promise that it would proceed rigorously against all guilty of such activity.

5. This declaration to be at once communicated by the King of Serbia to his army, and to be published in the official bulletin as an order of the day.

6. All anti-Austrian publications in Serbia to be suppressed.

7. The Serbian political party known as the "National Union" to be suppressed, and its means of propaganda to be confiscated.

8. All anti-Austrian teaching in the schools of Serbia to be suppressed.

9. All officers, civil and military, who might be designated by Austria as guilty of anti-Austrian propaganda to be dismissed by the Serbian Government.

10. Austrian agents to co-operate with the Serbian

Government in suppressing all anti-Austrian propaganda, and to take part in the judicial proceedings conducted in Serbia against those charged with complicity in the crime at Sarajevo.

11. Serbia to explain to Austria the meaning of anti-Austrian utterances of Serbian officials at home and abroad, since the assassination.

To the first and second demands Serbia unhesitatingly assented.

To the third demand, Serbia assented, although no evidence was given to show that Serbian officers had taken part in the propaganda.

The Serbian Government assented to the fourth, fifth, sixth, seventh and eighth demands also.

Extraordinary as was the ninth demand, which would allow the Austrian Government to proscribe Serbian officials, so eager for peace and friendship was the Serbian Government that it assented to it, with the stipulation that the Austrian Government should offer some proof of the guilt of the proscribed officers.

The tenth demand, which in effect allowed Austrian agents to control the police and courts of Serbia, it was not possible for Serbia

to accept without abrogating her sovereignty. However, it was not unconditionally rejected, but the Serbian Government asked that it be made the subject of further discussion, or be referred to arbitration.

The Serbian Government assented to the eleventh demand, on the condition that if the explanations which would be given concerning the alleged anti-Austrian utterances of Serbian officials would not prove satisfactory to the Austrian Government, the matter should be submitted to mediation or arbitration.

Behind the threat conveyed in the Austrian ultimatum was the menacing figure of militant Germany. The veil that had hitherto concealed the hands that worked the string, was removed when Germany, under the pretense of localizing the quarrel to Serbian and Austrian soil, interrogated France and England, asking them to prevent Russia from defending Serbia in the event of an attack by Austria upon the Serbs. England and France promptly refused to participate in a tragedy which would deliver Serbia to Austria as Bos-

nia had been delivered. Russia, bound by race and creed to Serbia, read into the ultimatum of Teutonic kultur a determination for warfare. Mobilization of the Russian forces along the Austrian frontier was arranged, when it was seen that Serbia's pacific reply to Austria's demands would be contemptuously disregarded by Germany and Austria.

During the days that intervened between the issuance of the ultimatum and the actual declaration of war by Germany against Russia on Saturday, August 1st, various sincere efforts were made to stave off the world-shaking catastrophe. Arranged chronologically, these events may thus be summarized: Russia, on July 24th, formally asked Austria if she intended to annex Serbian territory by way of reprisal for the assassination at Sarajevo. On the same day Austria replied that it had no present intention to make such annexation. Russia then requested an extension of the forty-eight-hour time-limit named in the ultimatum.

Austria, on the morning of Saturday, July

25th, refused Russia's request for an extension of the period named in the ultimatum. On the same day, the newspapers published in Petrograd printed an official note issued by the Russian Government warning Europe generally that Russia would not remain indifferent to the fate of Serbia. These newspapers also printed the appeal of the Serbian Crown Prince to the Czar dated on the preceding day, urging that Russia come to the rescue of the menaced Serbs. Serbia's peaceful reply surrendering on all points except one, and agreeing to submit that to arbitration, was sent late in the afternoon of the same day, and that night Austria declared the reply to be unsatisfactory and withdrew its minister from Belgrade.

England commenced its attempts at pacification on the following day, Sunday, July 26th. Sir Edward Grey spent the entire Sabbath in the Foreign Office and personally conducted the correspondence that was calculated to bring the dispute to a peaceful conclusion. He did not reckon, however, with a Germany determined upon war, a Germany whose manufac-

turers, ship-owners and Junkers had combined with its militarists to achieve "Germany's place in the sun" even though the world would be stained in the blood of the most frightful war this earth has ever known. Realization of this fact did not come to Sir Edward Grey until his negotiations with Germany and with Austria-Hungary had proceeded for some time. His first suggestion was that the dispute between Russia and Austria be committed to the arbitration of Great Britain, France, Italy and Germany. Russia accepted this but Germany and Austria rejected it. Russia had previously suggested that the dispute be settled by a conference between the diplomatic heads at Vienna and Petrograd. This also was refused by Austria.

Sir Edward Grey renewed his efforts on Monday, July 27th, with an invitation to Germany to present suggestions of its own, looking toward a settlement. This note was never answered. Germany took the position that its proposition to compel Russia to stand aside while Austria punished Serbia had been re-

jected by England and France and it had nothing further to propose.

THE GERMAN CONFEDERATION IN 1815

During all this period of negotiation the German Foreign Office, to all outward appearances at least, had been acting independently

of the Kaiser, who was in Norway on a vacation trip. He returned to Potsdam on the night of Sunday, July 26th. On Monday morning the Czar of Russia received a personal message from the Kaiser, urging Russia to stand aside that Serbia might be punished. The Czar immediately replied with the suggestion that the whole matter be submitted to The Hague. No reply of any kind was ever made to this proposal by Germany.

All suggestions and negotiations looking forward to peace were brought to a tragic end on the following day, Tuesday, July 28th, when Austria declared war on Serbia, having speedily mobilized troops at strategic points on the Serbian border. Russian mobilization, which had been proceeding only in a tentative way, on the Austrian border, now became general, and on July 30th, mobilization of the entire Russian army was proclaimed.

Germany's effort to exclude England from the war began on Thursday, July 30th. A note, sounding Sir Edward Grey on the question of British neutrality in the event of war

was received, and a curt refusal to commit the British Empire to such a proposal was the reply. Sir Edward Grey, in a last determined effort to avoid a world-war, suggested to Germany, Austria, Serbia and Russia that the military operations commenced by Austria should be recognized as merely a punitive expedition. He further suggested that when a point in Serbian territory previously fixed upon should have been reached, Austria would halt and would submit her further action to arbitration in the conference of the Powers. Russia agreed unreservedly to this proposition. Austria gave a half-hearted assent to the principle involved. Germany made no reply.

The die was cast for war on the following day, July 31st, when Germany made a dictatorial and arrogant demand upon Russia that mobilization of that nation's military forces be stopped within twelve hours. Russia made no reply, and on Saturday, August 1st, Germany set the world aflame with the dread of war's horror by her declaration of war upon Russia.

Germany's responsibility for this monu-

mental crime against the peace of the world is eternally fixed upon her, not only by these outward and visible acts and negotiations, not only by her years of patient preparation for the war into which she plunged the world. The responsibility is fastened upon her forever by the revelations of her own ambassador to England during this fateful period. Prince Lichnowsky, in a remarkable communication which was given to the world, laid bare the machinations of the German High Command and its advisers. He was a guest of the Kaiser at Kiel on board the Imperial yacht Meteor when the message was received informing the Kaiser of the assassination at Sarajevo. His story continues.

Being unacquainted with the Vienna viewpoint and what was going on there, I attached no very far-reaching significance to the event; but, looking back, I could feel sure that in the Austrian aristocracy a feeling of relief outweighed all others. His Majesty regretted that his efforts to win over the Archduke to his ideas had thus been frustrated by the Archduke's assassination. . . .

I went on to Berlin and saw the Chancellor, von Bethmann-Hollweg. I told him that I regarded our foreign situation as very satisfactory as it was a long time in-

deed since we had stood so well with England. And in France there was a pacifist cabinet. Herr von Bethmann-Hollweg did not seem to share my optimism. He complained of the Russian armaments. I tried to tranquilize him with the argument that it was not to Russia's interest to attack us, and that such an attack would never have English or French support, as both countries wanted peace.

I went from him to Dr. Zimmermann (the under Secretary) who was acting for Herr von Jagow (the Foreign Secretary), and learned from him that Russia was about to call up nine hundred thousand new troops. His words unmistakably denoted ill-humor against Russia, who, he said, stood everywhere in our way. In addition, there were questions of commercial policy that had to be settled. That General von Moltke was urging war was, of course, not told to me. I learned, however, that Herr von Tschirschky (the German Ambassador at Vienna) had been reproved because he said that he had advised Vienna to show moderation toward Serbia.

Prince Lichnowsky went to his summer home in Silesia, quite unaware of the impending crisis. He continues:

When I returned from Silesia on my way to London, I stopped only a few hours in Berlin, where I heard that Austria intended to proceed against Serbia so as to bring to an end an unbearable state of affairs. Unfortunately, I failed at the moment to gauge the significance of the news. I thought that once more it would come to nothing; that even if Russia acted threateningly, the

matter could soon be settled. I now regret that I did not stay in Berlin and declare there and then that I would have no hand in such a policy.

There was a meeting in Potsdam, as early as July 5th, between the German and Austrian authorities, at which meeting war was decided on. Prince Lichnowsky says:

I learned afterwards that at the decisive discussion at Potsdam on July 5th the Austrian demand had met with the unconditional approval of all the personages in authority; it was even added that no harm would be done if war with Russia did come out of it. It was so stated at least in the Austrian report received at London by Count Mensdorff (the Austrian Ambassador to England).

At this point I received instructions to endeavor to bring the English press to a friendly attitude in case Austria should deal the death-blow to "Greater-Serbian" hopes. I was to use all my influence to prevent public opinion in England from taking a stand against Austria. I remember England's attitude during the Bosnian annexation crisis, when public opinion showed itself in sympathy with the Serbian claims to Bosnia; I recalled also the benevolent promotion of nationalist hopes that went on in the days of Lord Byron and Garibaldi; and on these and other grounds I thought it extremely unlikely that English public opinion would support a punitive expedition against the Archduke's murderers. I thus felt it my duty to enter an urgent warning against

the whole project, which I characterized as venturesome and dangerous, I recommended that counsels of moderation be given Austria, as I did not believe that the conflict could be localized (that is to say, it could not be limited to a war between Austria and Serbia).

Herr von Jagow answered me that Russia was not prepared; that there would be more or less of a rumpus; but that the more firmly we stood by Austria, the more surely would Russia give way. Austria was already blaming us for flabbiness and we could not flinch. On the other hand, Russian sentiment was growing more unfriendly all the time, and we must simply take the risk. I subsequently learned that this attitude was based on advices from Count Pourtales (the German Ambassador in Petrograd), that Russia would not stir under any circumstances; information which prompted us to spur Count Berchtold on in his course. On learning the attitude of the German Government I looked for salvation through English mediation, knowing that Sir Edward Grey's influence in Petrograd could be used in the cause of peace. I therefore, availed myself of my friendly relations with the Minister to ask him confidentially to advise moderation in Russia in case Austria demanded satisfaction from the Serbians, as it seemed likely she would.

The English press was quiet at first, and friendly to Austria, the assassination being generally condemned. By degrees, however, more and more voices made themselves heard, in the sense that, however necessary it might be to take cognizance of the crime, any exploitation of it for political ends was unjustifiable. Moderation was enjoined upon Austria. When the ultimatum

came out, all the papers, with the exception of the *Standard*, were unanimous in condemning it. The whole world, outside of Berlin and Vienna, realized that it meant war, and a world war too. The English fleet, which happened to have been holding a naval review, was not demobilized.

The British Government labored to make the Serbian reply conciliatory, and "the Serbian answer was in keeping with the British efforts." Sir Edward Grey then proposed his plan of mediation upon the two points which Serbia had not wholly conceded. Prince Lichnowsky writes:

Mr. Cambon (for France), Marquis Imperiali (for Italy), and I were to meet, with Sir Edward in the chair, and it would have been easy to work out a formula for the debated points, which had to do with the co-operation of imperial and royal officials in the inquiries to be conducted at Belgrade. By the exercise of good will everything could have been settled in one or two sittings, and the mere acceptance of the British proposal would have relieved the strain and further improved our relations with England. I seconded this plan with all my energies. In vain. I was told (by Berlin) that it would be against the dignity of Austria. Of course, all that was needed was one hint from Berlin to Count Berchtold (the Austrian Foreign Minister); he would have satisfied himself with a diplomatic triumph

and rested on the Serbian answer. That hint was never given. On the contrary, pressure was brought in favor of war. . . .

After our refusal Sir Edward asked us to come forward with our proposal. We insisted on war. No other answer could I get (from Berlin) than that it was a colossal condescension on the part of Austria not to contemplate any acquisition of territory. Sir Edward justly pointed out that one could reduce a country to vassalage without acquiring territory; that Russia would see this, and regard it as a humiliation not to be put up with. The impression grew stronger and stronger that we were bent on war. Otherwise our attitude toward a question in which we were not directly concerned was incomprehensible. The insistent requests and well-defined declarations of M. Sasanof, the Czar's positively humble telegrams, Sir Edward's repeated proposals, the warnings of Marquis San Guiliano and of Bollati, my own pressing admonitions were all of no avail. Berlin remained inflexible—Serbia must be slaughtered.

Then, on the 29th, Sir Edward decided upon his well-known warning. I told him I had always reported (to Berlin) that we should have to reckon with English opposition if it came to a war with France. Time and again the Minister said to me, "If war breaks out it will be the greatest catastrophe the world has ever seen." And now events moved rapidly. Count Berchtold at last decided to come around, having up to that point played the rôle of "Strong man" under guidance of Berlin. Thereupon we (in answer to Russia's mobilization) sent our ultimatum and declaration of war—after Russia had spent a whole week in fruitless negotiation and waiting.

Thus ended my mission in London. It had suffered shipwreck, not on the wiles of the Briton but on the wiles of our own policy. Were not those right who saw that the German people were pervaded with the spirit of Treitschke and Bernhardi, which glorifies war as an end instead of holding it in abhorrence as an evil thing? Properly speaking militarism is a school for the people and an instrument to further political ends. But in the patriarchal absolutism of a military monarchy, militarism exploits politics to further its own ends, and can create a situation which a democracy freed from junkerdom would not tolerate.

That is what our enemies think; that is what they are bound to think when they see that in spite of capitalistic industrialism and in spite of socialistic organizations, the living, as Nietzsche said, are still ruled by the dead. The democratization of Germany, the first war aim proposed by our enemies, will become a reality.

This is the frank statement of a great German statesman made long before Germany received its knock-out blow. It was written when German militarism was sweeping all before it on land, and when the U-boat was at the height of its murderous powers on the high seas.

No one in nor out of Germany has controverted any of its statements and it will forever remain as one of the counts in the indictment

against Germany and the sole cause of the world's greatest misery, the war.

America's outstanding authority on matters of international conduct, former Secretary of State Elihu Root, declared that the World War was a mighty and all-embracing struggle between two conflicting principles of human right and human duty; it was a conflict between the divine right of kings to govern mankind through armies and nobles, and the right of the peoples of the earth who toil and endure and aspire to govern themselves by law under justice, and in the freedom of individual manhood.

After the declaration of war against Russia by Germany, events marched rapidly and inevitably toward the general conflagration. Germany's most strenuous efforts were directed toward keeping England out of the conflict. We have seen in the revelations of Prince Lichnowsky how eager was England to divert Germany's murderous purpose. There are some details, however, required to fill in the diplomatic picture.

President Poincaré, of the French Repub-

lic, on July 30th, asked the British Ambassador in Paris for an assurance of British support. On the following day he addressed a similar letter to King George of England. Both requests were qualifiedly refused on the ground that England wished to be free to continue negotiations with Germany for the purpose of averting the war. In the meantime, the German Government addressed a note to England offering guarantees for Belgian integrity, providing Belgium did not side with France, offering to respect the neutrality of Holland and giving assurance that no French territory in Europe would be annexed if Germany won the war. Sir Edward Grey described this as a "shameful proposal," and rejected it on July 30th.

On July 31st England sent a note to France and Germany asking for a statement of purpose concerning Belgian neutrality. France immediately announced that it would respect the treaty of 1839 and its reaffirmation in 1870, guaranteeing Belgium's neutrality. This treaty was entered into by Germany, England,

France, Austria and Russia. Germany's reply on August 1st was a proposal that she would respect the neutrality of Belgium if England would stay out of the war. This was promptly declined. On August 2d the British cabinet agreed that if the German fleet attempted to attack the coast of France the British fleet would intervene. Germany, the next day, sent a note agreeing to refrain from naval attacks on France provided England would remain neutral, but declined to commit herself as to the neutrality of Belgium. Before this, however, on August 2d, Germany had announced to Belgium its intention to enter Belgium for the purpose of attacking France. The Belgian Minister in London made an appeal to the British Foreign Office and was informed that invasion of Belgium by Germany would be followed by England's declaration of war. Monday, August 3d, was signalized by Belgium's declaration of its neutrality and its firm purpose to defend its soil against invasion by France, England, Germany or any other nation.

### THE KAISER AND HIS SIX SONS

The ex-Emperor and his sons leading a procession in Berlin soon after the declaration of war. It was noted that in spite of their martial appearance the royal family were extremely careful to keep out of range of the Allied guns. From left to right they are: The Kaiser, Crown Prince Frederick Wilhelm, Princes Paul, Friedrich, Adolf, August, Oscar and Joachim.

The actual invasion of Belgium commenced on the morning of August 4th, when twelve regiments of Uhlans crossed the frontier near Visé, and came in contact with a Belgian force driving it back upon Liège. King Albert of Belgium promptly appealed to England, Russia and France for aid in repelling the invader. England sent an ultimatum to Germany fixing midnight of August 4th as the time for expiration of the ultimatum. This demanded that satisfactory assurances be furnished immediately that Germany would respect the neutrality of Belgium. No reply was made by Germany and England's declaration of war followed.

Chancellor von Bethmann-Hollweg, of the German Empire, wrote Germany's infamy into history when, in a formal statement, he acknowledged that the invasion of Belgium was "a wrong that we will try to make good again as soon as our military ends have been reached." To Sir Edward Vochen, British Ambassador to Germany, he addressed the inquiry: "Is it the purpose of your country to make war upon

Germany for the sake of a scrap of paper?" The treaty of 1839-1870 guaranteeing Belgium's neutrality was the scrap of paper.

With the entrance of England into the war, the issue between autocracy and democracy was made plain before the people of the world. Austria, and later Turkey, joined with Germany; France, and Japan, by reason of their respective treaty obligations joined England and Russia. Italy for the time preferred to remain neutral, ignoring her implied alliance with the Teutonic empires. How other nations lined up on the one side and the other is indicated by the State Department's list of war declarations, and diplomatic severances, which follows:

- Austria against Belgium, Aug. 28, 1914.
- Austria against Japan, Aug. 27, 1914.
- Austria against Montenegro, Aug. 9, 1914.
- Austria against Russia, Aug. 6, 1914.
- Austria against Serbia, July 28, 1914
- Belgium against Germany, Aug. 4, 1914.
- Brazil against Germany, Oct. 26, 1917.
- Bulgaria against Serbia, Oct. 14, 1915.
- China against Austria, Aug. 14, 1917.
- China against Germany, Aug. 14, 1917.

Costa Rica against Germany, May 23, 1918.

Cuba against Germany, April 7, 1917.

Cuba against Austria-Hungary, Dec. 16, 1917.

France against Austria, Aug. 13, 1914.

France against Bulgaria, Oct. 16, 1915.

France against Germany, Aug. 3, 1914.

France against Turkey, Nov. 5, 1914.

Germany against Belgium, Aug. 4, 1914.

Germany against France, Aug. 3, 1914.

Germany against Portugal, March 9, 1916.

Germany against Roumania, Sept. 14, 1916.

Germany against Russia, Aug. 1, 1914.

Great Britain against Austria, Aug. 13, 1914.

Great Britain against Bulgaria, Oct. 15, 1915.

Great Britain against Germany, Aug. 4, 1914.

Great Britain against Turkey, Nov. 5, 1914.

Greece against Bulgaria, Nov. 28, 1916. (Provisional Government.)

Greece against Bulgaria, July 2, 1917. (Government of Alexander.)

Greece against Germany, Nov. 28, 1916. (Provisional Government.)

Greece against Germany, July 2, 1917. (Government of Alexander.)

Guatemala against Germany and Austria-Hungary, April 22, 1918.

Haiti against Germany, July 15, 1918.

Honduras against Germany, July 19, 1918.

Italy against Austria, May 24, 1915.

Italy against Bulgaria, Oct. 19, 1915.

Italy against Germany, Aug. 28, 1916.

Italy against Turkey, Aug. 21, 1915.

Japan against Germany, Aug. 23, 1914.

United States against Germany, April 6, 1917.

United States against Austria-Hungary, Dec. 7, 1917.

## SEVERANCE OF DIPLOMATIC RELATIONS

The Nations that formally severed relations whether afterward declaring war or not, are as follows:

Austria against Japan, Aug. 26, 1914.

Austria against Portugal, March 16, 1916.

Austria against Serbia, July 26, 1914.

Austria against United States, April 8, 1917.

Bolivia against Germany, April 14, 1917.

Brazil against Germany, April 11, 1917.

China against Germany, March 14, 1917.

Costa Rica against Germany, Sept. 21, 1917.

Ecuador against Germany, Dec. 7, 1917.

Egypt against Germany, Aug. 13, 1914.

France against Austria, Aug. 10, 1914.

Greece against Turkey, July 2, 1917. (Government of Alexander.)

Greece against Austria, July 2, 1917. (Government of Alexander.)

Guatemala against Germany, April 27, 1917.

Haiti against Germany, June 17, 1917.

Honduras against Germany, May 17, 1917.

Nicaragua against Germany, May 18, 1917.

Peru against Germany, Oct. 6, 1917.

Santo Domingo against Germany, June 8, 1917.

Turkey against United States, April 20, 1917.

United States against Germany, Feb. 3, 1917.

Uruguay against Germany, Oct. 7, 1917.

## CHAPTER V

### THE GREAT WAR BEGINS

**Y**EARS before 1914, when Germany declared war against civilization, it was decided by the German General Staff to strike at France through Belgium. The records of the German Foreign Office prove that fact. The reason for this lay in the long line of powerful fortresses along the line that divides France from Germany and the sparsely spaced and comparatively out-of-date forts on the border between Germany and Belgium. True, there was a treaty guaranteeing the inviolability of Belgian territory to which Germany was a signatory party. Some of the clauses of that treaty were:

Article 9. Belgium, within the limits traced in conformity with the principles laid down in the present preliminaries, shall form a perpetually neutral state. The five powers (England, France, Austria, Prussia and Russia), without wishing to intervene in the internal af-

fairs of Belgium, guarantee her that perpetual neutrality as well as the integrity and inviolability of her territory in the limits mentioned in the present article.

Article 10. By just reciprocity Belgium shall be held to observe this same neutrality toward all the other states and to make no attack on their internal or external tranquillity while always preserving the right to defend herself against any foreign aggression.

This agreement was followed on January 23, 1839, by a definitive treaty, accepted by Belgium and by the Netherlands, which treaty regulates Belgium's neutrality as follows:

Article 7. Belgium, within the limits defined in Articles 1, 2 and 4, shall form an independent and perpetually neutral state. She is obligated to preserve this neutrality against all the other states.

To convert this solemn covenant into a "scrap of paper" it was necessary that Germany should find an excuse for tearing it to pieces. There was absolutely no provocation in sight, but that did not deter the German High Command. That august body with no information whatever to afford an excuse, alleged in a formal note to the Belgian Government that the French army intended to invade Germany through Belgian territory. This

hypocritical and mendacious note and Belgium's vigorous reply follow:

Note handed in on August 2, 1914, at 7 o'clock P. M., by Herr von Below-Saleske, German Minister, to M. Davignon, Belgian Minister for Foreign Affairs.

BRUSSELS, 2d August, 1914.

IMPERIAL GERMAN LEGATION IN BELGIUM

(Highly confidential)

The German Government has received reliable information according to which the French forces intend to march on the Meuse, by way of Givet and Namur. This information leaves no doubt as to the intention of France of marching on Germany through Belgian territory. The Imperial Government cannot avoid the fear that Belgium, in spite of its best will, will be in no position to repulse such a largely developed French march without aid. In this fact there is sufficient certainty of a threat directed against Germany.

It is an imperative duty for the preservation of Germany to forestall this attack of the enemy.

The German Government would feel keen regret if Belgium should regard as an act of hostility against herself the fact that the measures of the enemies of Germany oblige her on her part to violate Belgian territory.

In order to dissipate any misunderstanding the German Government declares as follows:

1. Germany does not contemplate any act of hostility against Belgium. If Belgium consents in the war about to commence to take up an attitude of friendly neutrality

toward Germany, the German Government on its part undertakes, on the declaration of peace, to guarantee the kingdom and its possessions in their whole extent.

2. Germany undertakes under the conditions laid down to evacuate Belgian territory as soon as peace is concluded.

3. If Belgium preserves a friendly attitude, Germany is prepared, in agreement with the authorities of the Belgian Government, to buy against cash all that is required by her troops, and to give indemnity for the damages caused in Belgium.

4. If Belgium behaves in a hostile manner toward the German troops, and in particular raises difficulties against their advance by the opposition of the fortifications of the Meuse, or by destroying roads, railways, tunnels, or other engineering works, Germany will be compelled to consider Belgium as an enemy.

In this case Germany will take no engagements toward Belgium, but she will leave the later settlement of relations of the two states toward one another to the decision of arms. The German Government has a justified hope that this contingency will not arise and that the Belgian Government will know how to take suitable measures to hinder its taking place. In this case the friendly relations which unite the two neighboring states will become closer and more lasting.

#### THE REPLY BY BELGIUM

Note handed in by M. Davignon, Minister for Foreign Affairs, to Herr von Below-Saleske, German Minister.

BRUSSELS, 3d August, 1914.  
(7 o'clock in the morning.)

By the note of the 2d August, 1914, the German Government has made known that according to certain intelligence the French forces intend to march on the Meuse via Givet and Namur and that Belgium, in spite of her good-will, would not be able without help to beat off an advance of the French troops.

The German Government felt it to be its duty to forestall this attack and to violate Belgian territory. Under these conditions Germany proposes to the King's Government to take up a friendly attitude, and undertakes at the moment of peace to guarantee the integrity of the kingdom and of her possessions in their whole extent. The note adds that if Belgium raises difficulties to the forward march of the German troops Germany will be compelled to consider her as an enemy and to leave the later settlement of the two states toward one another to the decision of arms.

This note caused profound and painful surprise to the King's Government.

The intentions which it attributed to France are in contradiction with the express declarations which were made to us on the 1st of August, in the name of the government of the republic.

Moreover, if, contrary to our expectation, a violation of Belgian neutrality were to be committed by France, Belgium would fulfil all her international duties and her army would offer the most vigorous opposition to the invader.

The treaties of 1839, confirmed by the treaties of 1870, establish the independence and the neutrality of Belgium

under the guarantee of the powers, and particularly of the Government of his Majesty the King of Prussia.

Belgium has always been faithful to her international obligations; she has fulfilled her duties in a spirit of loyal impartiality; she has neglected no effort to maintain her neutrality or to make it respected.

The attempt against her independence with which the German Government threatens her would constitute a flagrant violation of international law. No strategic interest justifies the violation of that law.

The Belgian government would, by accepting the propositions which are notified to her, sacrifice the honor of the nation while at the same time betraying her duties toward Europe.

Conscious of the part Belgium has played for more than eighty years in the civilization of the world, she refuses to believe that the independence of Belgium can be preserved only at the expense of the violation of her neutrality.

If this hope were disappointed the Belgian Government has firmly resolved to repulse by every means in her power any attack upon her rights.

The German attack upon Belgium and France came with terrible force and suddenness. Twenty-four army corps, divided into three armies clad in a specially designed and colored gray-green uniform, swept in three mighty streams over the German borders with their objective the heart of France. The

Army of the Meuse was given the route through Liège, Namur and Maubeuge. The Army of the Moselle violated the Duchy of Luxemburg, which, under a treaty guaranteeing its independence and neutrality, was not permitted to maintain an army. Germany was a signatory party to this treaty also. The Army of the Rhine cut through the Vosges Mountains and its route lay between the French cities of Nancy and Toul.

The heroic defense of the Belgian army at Liège against the Army of the Meuse delayed the operation of Germany's plans and in all probability saved Paris. It was the first of many similar disappointments and checks that Germany encountered during the war.

The defense of Liège continued for ten heroic days. Within that interval the first British Expeditionary Forces were landed in France and Belgium, the French army was mobilized to full strength. The little Belgian army falling back northward on Antwerp, Louvain and Brussels, threatened the German flank and approximately 200,000 German sol-

# KING ALBERT AT THE HEAD OF THE HEROIC SOLDIERS OF BELGIUM

It is understood that the Belgian monarch, who is believed to have had a real leader of his troops. That with the very whole of his army, who accompanied the world for organizing the Germans, infinitely making it possible enough to allow France to get her armies into shape and prevent the immediate taking of Paris that was planned by Germany.

diers were compelled to remain in the conquered section of Belgium to garrison it effectively.

Liège fortifications were the design of the celebrated strategist Brialmont. They consisted of twelve isolated fortresses which had been permitted to become out of repair. No field works of any kind connected them and they were without provision for defense against encircling tactics and against modern artillery.

The huge 42-centimeter guns, the first of Germany's terrible surprises, were brought into action against these forts, and their concrete and armored steel turrets were cracked as walnuts are cracked between the jaws of a nut-cracker. The Army of the Meuse then made its way like a gray-green cloud of poison gas through Belgium. A cavalry screen of crack Uhlan regiments preceded it, and it made no halt worthy of note until it confronted the Belgian army on the line running from Louvain to Namur. The Belgians were forced back before Louvain on August 20th, the Belgian Government removed the capital

from Brussels to Antwerp, and the German hosts entered evacuated Brussels.

During this advance of the Army of the Meuse, strong French detachments invaded German soil, pouring into Alsace through the Belfort Gap. Brief successes attended the bold stroke. Mülhausen was captured and the Metz-Strassburg Railroad was cut in several places. The French suffered a defeat almost immediately following this first flush of victory, both in Alsace and in Lorraine, where a French detachment had engaged with the Army of the Moselle. The French army thereupon retreated to the strong line of forts and earthworks defending the border between France and Germany.

England's first expeditionary force landed at Ostend, Calais and Dunkirk on August 7th. It was dubbed England's "contemptible little army" by the German General Staff. That name was seized upon gladly by England as a spur to volunteering. It brought to the surface national pride and a fierce determination to compel Germany to recognize and

to reckon with the "contemptible little army."

The contact between the French, Belgian and British forces was speedily established and something like concert resistance to the advance of the enemy was made possible. The German army, however, followed by a huge equipment of motor kitchens, munition trains, and other motor transport evidencing great care in preparation for the movement, swept resistlessly forward until it encountered the French and British on a line running from Mons to Charleroi.

The British army was assigned to a position between two French armies. By some miscalculation, the French army that was to have taken its position on the British left, never appeared. The French army on the right was attacked and defeated at Charleroi, falling back in some confusion. The German Army of the Moselle co-operating with the Army of the Meuse then attacked the British and French, and a great flanking movement by the German joint commands developed.

This was directed mainly at the British un-

der command of Sir John French. There followed a retreat that for sheer heroism and dogged determination has become one of the great battles of all time. The British, outflanked and outnumbered three to one, fought and marched without cessation for six days and nights. Time after time envelopment and disaster threatened them, but with a determination that would not be beaten they fought off the best that Germany could send against them, maintained contact with the French army on their right, and delayed the German advance so effectively that a complete disarrangement of all the German plans ensued. This was the second great disappointment to Germany. It made possible the victory of the Marne and the victorious peace of 1918. The story of that immortal retreat is best told in the words of Sir John French, transmitting the report of this encounter to the British War Office. It follows:

“The transport of the troops from England both by sea and by rail was effected in the best order and without a check. Each unit ar-

rived at its destination well within the scheduled time.

"The concentration was practically complete on the evening of Friday, the 21st ultimo, and I was able to make dispositions to move the force during Saturday, the 22d, to positions I considered most favorable from which to commence operations which the French commander-in-chief, General Joffre, requested me to undertake in pursuance of his plans in prosecution of the campaign.

"The line taken up extended along the line of the canal from Condé on the west, through Mons and Binche on the east. This line was taken up as follows:

"From Condé to Mons, inclusive, was assigned to the Second Corps, and to the right of the Second Corps from Mons the First Corps was posted. The Fifth Cavalry Brigade was placed at Binche.

"In the absence of my Third Army Corps I desired to keep the cavalry divisions as much as possible as a reserve to act on my outer flank, or move in support of any threatened

part of the line. The forward reconnoissance was intrusted to Brig. Gen. Sir Philip Chetwode, with the Fifth Cavalry Brigade, but I directed General Allenby to send forward a few squadrons to assist in this work.

"During the 22d and 23d these advanced squadrons did some excellent work, some of them penetrating as far as Soignies, and several encounters took place in which our troops showed to great advantage.

"2. At 6 A. M., on August 23d, I assembled the commanders of the First and Second Corps and cavalry division at a point close to the position and explained the general situation of the Allies, and what I understood to be General Joffre's plan. I discussed with them at some length the immediate situation in front of us.

"From information I received from French headquarters I understood that little more than one, or at most two, of the enemy's army corps, with perhaps one cavalry division, were in front of my position; and I was aware of no attempted outflanking movement by the

enemy. I was confirmed in this opinion by the fact that my patrols encountered no undue opposition in their reconnoitering operations. The observations of my airplanes seemed to bear out this estimate.

"About 3 P. M. on Sunday, the 23d, reports began coming in to the effect that the enemy was commencing an attack on the Mons line, apparently in some strength, but that the right of the position from Mons and Bray was being particularly threatened.

"The commander of the First Corps had pushed his flank back to some high ground south of Bray, and the Fifth Cavalry Brigade evacuated Binche, moving slightly south; the enemy thereupon occupied Binche.

"The right of the Third Division, under General Hamilton, was at Mons, which formed a somewhat dangerous salient; and I directed the commander of the Second Corps to be careful not to keep the troops on this salient too long, but, if threatened seriously, to draw back the center behind Mons. This was done before dark. In the meantime, about 5 P. M.,

I received a most unexpected message from General Joffre by telegraph, telling me that at least three German corps, viz., a reserve corps, the Fourth Corps and the Ninth Corps, were moving on my position in front, and that the Second Corps was engaged in a turning movement from the direction of Tournay. He also informed me that the two reserve French divisions and the Fifth French Army on my right were retiring, the Germans having on the previous day gained possession of the passages of the Sambre, between Charleroi and Namur.

“3. In view of the possibility of my being driven from the Mons position, I had previously ordered a position in rear to be reconnoitered. This position rested on the fortress of Maubeuge on the right and extended west to Jenlain, southwest to Valenciennes, on the left. The position was reported difficult to hold, because standing crops and buildings made the placing of trenches very difficult and limited the field of fire in many important lo-

calities. It nevertheless afforded a few good artillery positions.

"When the news of the retirement of the French and the heavy German threatening on my front reached me, I endeavored to confirm it by airplane reconnoissance; and as a result of this I determined to effect a retirement to the Maubeuge position at daybreak on the 24th.

"A certain amount of fighting continued along the whole line throughout the night and at daybreak on the 24th the Second Division from the neighborhood of Harmignies made a powerful demonstration as if to retake Binche. This was supported by the artillery of both the First and Second Divisions, while the First Division took up a supporting position in the neighborhood of Peissant. Under cover of this demonstration the Second Corps retired on the line Dour-Quaroules-Frameries. The Third Division on the right of the corps suffered considerable loss in this operation from the enemy, who had retaken Mons.

"The Second Corps halted on this line, where they partially intrenched themselves, enabling Sir Douglas Haig with the First Corps gradually to withdraw to the new position; and he effected this without much further loss, reaching the line Bavai-Maubeuge about 7 P. M. Toward midday the enemy appeared to be directing his principal effort against our left.

"I had previously ordered General Allenby with the cavalry to act vigorously in advance of my left front and endeavor to take the pressure off.

"About 7.30 A. M. General Allenby received a message from Sir Charles Ferguson, commanding the Fifth Division, saying that he was very hard pressed and in urgent need of support. On receipt of this message General Allenby drew in the cavalry and endeavored to bring direct support to the Fifth Division.

"During the course of this operation General De Lisle, of the Second Cavalry Brigade, thought he saw a good opportunity to paralyze the further advance of the enemy's infantry

by making a mounted attack on his flank. He formed up and advanced for this purpose, but was held up by wire about five hundred yards from his objective, and the Ninth Lancers and the Eighteenth Hussars suffered severely in the retirement of the brigade.

“The Nineteenth Infantry Brigade, which had been guarding the line of communications, was brought up by rail to Valenciennes on the 22d and 23d. On the morning of the 24th they were moved out to a position south of Quareouble to support the left flank of the Second Corps.

“With the assistance of the cavalry Sir Horace Smith-Dorrien was enabled to effect his retreat to a new position; although, having two corps of the enemy on his front and one threatening his flank, he suffered great losses in doing so.

“At nightfall the position was occupied by the Second Corps to the west of Bavai, the First Corps to the right. The right was protected by the Fortress of Maubeuge, the left by the Nineteenth Brigade in position between

Jenlain and Bry, and the cavalry on the outer flank.

"4. The French were still retiring, and I had no support except such as was afforded by the Fortress of Maubeuge; and the determined attempts of the enemy to get round my left flank assured me that it was his intention to hem me against that place and surround me. I felt that not a moment must be lost in retiring to another position.

"I had every reason to believe that the enemy's forces were somewhat exhausted and I knew that they had suffered heavy losses. I hoped, therefore, that his pursuit would not be too vigorous to prevent me effecting my object.

"The operation, however, was full of danger and difficulty, not only owing to the very superior force in my front, but also to the exhaustion of the troops.

"The retirement was recommenced in the early morning of the 25th to a position in the neighborhood of Le Cateau, and rearguards were ordered to be clear of the Maubeuge-Bavai-Eih Road by 5.30 A. M.

“Two cavalry brigades, with the divisional cavalry of the Second Corps, covered the movement of the Second Corps. The remainder of the cavalry division, with the Nineteenth Brigade, the whole under the command of General Allenby, covered the west flank.

“The Fourth Division commenced its de-trainment at Le Cateau on Sunday, the 23d, and by the morning of the 25th eleven battalions and a brigade of artillery with divisional staff were available for service.

“I ordered General Snow to move out to take up a position with his right south of Solesmes, his left resting on the Cambrai-Le Cateau Road south of La Chaprie. In this position the division rendered great help to the effective retirement of the Second and First Corps to the new position.

“Although the troops had been ordered to occupy the Cambrai-Le Cateau-Landrecies position, and the ground had, during the 25th, been partially prepared and intrenched, I had grave doubts, owing to the information I had received as to the accumulating strength of

the enemy against me—as to the wisdom of standing there to fight.

“Having regard to the continued retirement of the French on my right, my exposed left flank, the tendency of the enemy’s western corps (II) to envelope me, and, more than all, the exhausted condition of the troops, I determined to make a great effort to continue the retreat until I could put some substantial obstacle, such as the Somme or the Oise, between my troops and the enemy, and afford the former some opportunity of rest and reorganization. Orders were, therefore, sent to the corps commanders to continue their retreat as soon as they possibly could toward the general line Vermand-St. Quentin-Ribemont.

“The cavalry under General Allenby, were ordered to cover the retirement.

“Throughout the 25th and far into the evening, the First Corps continued its march on Landrecies, following the road along the eastern border of the Forêt de Mormal, and arrived at Landrecies about 10 o’clock. I had intended that the corps should come further

west so as to fill up the gap between Le Cateau and Landrecies, but the men were exhausted and could not get further in without rest.

“The enemy, however, would not allow them this rest, and about 9.30 P. M. a report was received that the Fourth Guards Brigade in Landrecies was heavily attacked by troops of the Ninth German Army Corps, who were coming through the forest on the north of the town. This brigade fought most gallantly, and caused the enemy to suffer tremendous loss in issuing from the forest into the narrow streets of the town. This loss has been estimated from reliable sources at from 700 to 1,000. At the same time information reached me from Sir Douglas Haig that his First Division was also heavily engaged south and east of Maroilles. I sent urgent messages to the commander of the two French reserve divisions on my right to come up to the assistance of the First Corps, which they eventually did. Partly owing to this assistance, but mainly to the skillful manner in which Sir Douglas Haig extricated his corps from an exceptionally dif-

ficult position in the darkness of the night, they were able at dawn to resume their march south toward Wassigny on Guise.

“By about 6 P. M. the Second Corps had got into position with their right on Le Cateau, their left in the neighborhood of Caudry, and the line of defense was continued thence by the Fourth Division toward Seranvillers, the left being thrown back.

“During the fighting on the 24th and 25th the cavalry became a good deal scattered, but by the early morning of the 26th, General Allenby had succeeded in concentrating two brigades to the south of Cambrai.

“The Fourth Division was placed under the orders of the general officer commanding the Second Army Corps.

“On the 24th the French cavalry corps, consisting of three divisions under General Sordêt, had been in billets north of Avesnes. On my way back from Bavai, which was my ‘Poste de Commandement’ during the fighting of the 23d and 24th, I visited General Sordêt, and earnestly requested his co-operation and sup-

port. He promised to obtain sanction from his army commander to act on my left flank, but said that his horses were too tired to move before the next day. Although he rendered me valuable assistance later on in the course of the retirement, he was unable, for the reasons given, to afford me any support on the most critical day of all, viz., the 26th.

“At daybreak it became apparent that the enemy was throwing the bulk of his strength against the left of the position occupied by the Second Corps and the Fourth Division.

“At this time the guns of four German army corps were in position against them, and Sir Horace Smith-Dorrien reported to me that he judged it impossible to continue his retirement at daybreak (as ordered) in face of such an attack.

“I sent him orders to use his utmost endeavors to break off the action and retire at the earliest possible moment, as it was impossible for me to send him any support, the First Corps being at the moment incapable of movement.

“The French Cavalry Corps, under General Sordêt, was coming up on our left rear early in the morning, and I sent an urgent message to him to do his utmost to come up and support the retirement of my left flank; but owing to the fatigue of his horses he found himself unable to intervene in any way.

“There had been no time to intrench the position properly, but the troops showed a magnificent front to the terrible fire which confronted them.

“The artillery, although outmatched by at least four to one, made a splendid fight, and inflicted heavy losses on their opponents.

“At length it became apparent that, if complete annihilation was to be avoided, a retirement must be attempted; and the order was given to commence it about 3.30 P. M. The movement was covered with the most devoted intrepidity and determination by the artillery, which had itself suffered heavily, and the fine work done by the cavalry in the further retreat from the position assisted materially in the

final completion of this most difficult and dangerous operation.

“Fortunately the enemy had himself suffered too heavily to engage in an energetic pursuit.

“I cannot close the brief account of this glorious stand of the British troops without putting on record my deep appreciation of the valuable services rendered by Gen. Sir Horace Smith-Dorrien.

“I say without hesitation that the saving of the left wing of the army under my command on the morning of the 26th of August, could never have been accomplished unless a commander of rare and unusual coolness, intrepidity, and determination had been present to personally conduct the operation.

“The retreat was continued far into the night of the 26th and through the 27th and 28th, on which date the troops halted on the line Noyon-Chauny-La Fère, having then thrown off the weight of the enemy’s pursuit.

“On the 27th and 28th I was much indebted

to General Sordêt and the French cavalry division which he commands for materially assisting my retirement and successfully driving back some of the enemy on Cambrai.

“General D’Amade also, with the Sixty-first and Sixty-second French Reserve Divisions, moved down from the neighborhood of Arras on the enemy’s right flank and took much pressure off the rear of the British forces.

“This closes the period covering the heavy fighting which commenced at Mons on Sunday afternoon, 23d August, and which really constituted a four days’ battle.

“At this point, therefore, I propose to close the present dispatch.

“I deeply deplore the very serious losses which the British forces have suffered in this great battle; but they were inevitable in view of the fact that the British army—only two days after a concentration by rail—was called upon to withstand a vigorous attack of five Germany army corps.

“It is impossible for me to speak too highly of the skill evinced by the two general officers

### A SCENE FROM EARLY TRENCH WARFARE

From the woods in the background the British charge on an angle of the German breastworks under cover of artillery and machine gun fire. This illustrates the early French warfare before the development of elaborate concrete structures like the Hindenburg line which the Germans later devised.

commanding army corps; the self-sacrificing and devoted exertions of their staffs; the direction of the troops by divisional, brigade, and regimental leaders; the command of the smaller units by their officers; and the magnificent fighting spirit displayed by non-commissioned officers and men.

“I wish particularly to bring to your Lordship’s notice the admirable work done by the Royal Flying Corps under Sir David Henderson. Their skill, energy, and perseverance have been beyond all praise. They have furnished me with the most complete and accurate information, which has been of incalculable value in the conduct of the operations. Fired at constantly both by friend and foe, and not hesitating to fly in every kind of weather, they have remained undaunted throughout.

“Further, by actually fighting in the air, they have succeeded in destroying five of the enemy’s machines.”

The combined French and British armies, including the forces that had retreated from

Alsace and Lorraine, gave way with increasing stubbornness before von Kluck. That German general disregarding the fortresses surrounding Paris, swung southward to make a junction with the Army of the Crown Prince of Germany advancing through the Vosges Mountains. General Manoury's army opposed the German advance on the entrenched line of Paris. General Gallieni commanding the garrison of Paris, was ready with a novel mobile transport consisting of taxicabs and fast trucks. The total number of soldiers in the French and British armies now outnumbered those in the German armies opposed to them.

General Joffre, in supreme command of the French, had chosen the battleground. He had set the trap with consummate skill. The word was given; the trap was sprung; and the first battle of the Marne came as a crashing surprise to Germany.

## CHAPTER VI

### ~~THE~~ TRAIL OF THE BEAST IN BELGIUM

GERMANY'S onrush into heroic Belgium speedily resolved itself into a saturnalia that drenched the land with blood and roused the civilized world into resentful horror. As the tide of barbarity swept forward into Northern France, stories of the horrors filtered through the close web of German censorship. There were denials at first by German propagandists. In the face of truth furnished by thousands of witnesses, the denials faded away.

What caused these atrocities? Were they the spontaneous expression of dormant brutishness in German soldiers? Were they a sudden reversion of an entire nation to bestiality?

The answer is that the private soldier as an individual was not responsible. The carnage, the rapine, the wholesale desolation was an in-

tegral part of the German policy of *schrecklichkeit* or frightfulness. This policy was laid down by Germany as part of its imperial war code. In 1902 Germany issued a new war manual entitled "Kriegsbrauch im Landkriege." In it is written this cold-blooded declaration:

All measures which conduce to the attainment of the object of war are permissible and these may be summarized in the two ideas of violence and cunning. What is permissible includes every means of war without which the object of the war cannot be attained. All means which modern invention affords, including the fullest, most dangerous, and most massive means of destruction, may be utilized.

Brand Whitlock, United States Minister to Belgium, in a formal report to the State Department, made this statement concerning Germany's policy in permitting these outrages:

"All these deliberate organized massacres of civilians, all these murders and outrages, the violation of women, the killing of children, wanton destruction, burning, looting and pillage, and whole towns destroyed, were acts for which no possible military necessity can be

pleaded. They were wilfully committed as part of a deliberately prepared and scientifically organized policy of terrorism.”

And now, having considered these outrages as part of the German policy of terrorism, let us turn to the facts presented by those who made investigations at first hand in devastated Belgium and Northern France.

Let us first return to the tragic story of the destruction of Louvain. The first document comes in the form of a cable sent from the Belgian Minister of Foreign Affairs under date of August 8, 1914:

“On Tuesday evening a body of German troops who had been driven back retired in disorder upon the town of Louvain. Germans who were guarding the town thought that the retiring troops were Belgians and fired upon them. In order to excuse this mistake the Germans, in spite of the most energetic denials on the part of the authorities, pretended that Belgians had fired on the Germans, although all the inhabitants, including policemen, had been disarmed for more than a week. With-

out any examination and without listening to any protest the commanding officer announced that the town would be immediately destroyed. All inhabitants had to leave their homes at once; some were made prisoners; women and children were put into a train of which the destination was unknown; soldiers with fire bombs set fire to the different quarters of the town; the splendid Church of St. Pierre, the markets, the university and its scientific establishments, were given to the flames, and it is probable that the Hotel de Ville, this celebrated jewel of Gothic art, will also have disappeared in the disaster. Several notabilities were shot at sight. Thus a town of 40,000 inhabitants, which, since the fifteenth century, has been the intellectual and scientific capital of the Low Countries, is a heap of ashes. Americans, many of whom have followed the course at this illustrious alma mater and have there received such cordial hospitality, cannot remain insensible to this outrage on the rights of humanity and civilization which is unprecedented in history."

Minister Whitlock made the following report on the same outrage:

“A violent fusillade broke out simultaneously at various points in the city (Louvain), notably at the Porte de Bruxelles, Porte de Tirlemont, Rue Leopold, Rue Marie-Thérèse, Rue des Joyeuses Entrées. German soldiers were firing at random in every street and in every direction. Later fires broke out everywhere, notably in the University building, the Library, in the old Church of St. Peter, in the Place du Peuple, in the Rue de la Station, in the Boulevard de Tirlemont, and in the Chaussée de Tirlemont. On the orders of their chiefs, the German soldiers would break open the houses and set fire to them, shooting on the inhabitants who tried to leave their dwellings. Many persons who took refuge in their cellars were burned to death. The German soldiers were equipped with apparatus for the purpose of firing dwellings, incendiary pastils, machines for spraying petroleum, etc. . . .

“Major von Manteuffel (of the German

forces) sent for Alderman Schmidt. Upon the latter's arrival, the major declared that hostages were to be held, as sedition had just broken out. He asked Father Parijs, Mr. Schmidt, and Mgr. Coenraedts, First Vice-Rector of the University, who was being held as a hostage, to make proclamations to the inhabitants exhorting them to be calm and menacing them with a fine of twenty million francs, the destruction of the city and the hanging of the hostages, if they created disturbance. Surrounded by about thirty soldiers and a few officers, Major Manteuffel, Father Parijs, Mr. Schmidt and Mgr. Coenraedts left in the direction of the station, and the alderman, in French, and the priest, in Flemish, made proclamations at the street corners. . . .

"Near the statue of Juste-Lipse, a Dr. Berghausen, a German surgeon, in a highly excited condition, ran to meet the delegation. He shouted that a German soldier had just been killed by a shot fired from the house of Mr. David Fishbach. Addressing the soldiers, Dr. Berghausen said: 'The blood of the en-

tire population of Louvain is not worth a drop of the blood of a German soldier!' Then one of the soldiers threw into the interior of the house of Mr. Fishbach one of the pastils which the German soldiers carried and immediately the house flared up. It contained paintings of a high value. The old coachman, Joseph Vandermosten, who had re-entered the house to try to save the life of his master, did not return. His body was found the next day amidst the ruins. . . .

"The Germans made the usual claim that the civil population had fired upon them and that it was necessary to take these measures, i. e., burn the churches, the library and other public monuments, burn and pillage houses, driving out and murdering the inhabitants, sacking the city in order to punish and to spread terror among the people, and General von Luttwitz had told me that it was reported that the son of the burgomaster had shot one of their generals.

"But the burgomaster of Louvain had no son, and no officer was shot at Louvain. The story

of a general shot by the son of a burgomaster was a repetition of a tragedy that had occurred at Aerschot, on the 19th, where the fifteen-year-old son of the burgomaster had been killed by a firing squad, not because he had shot a general, but because an officer had been shot, probably by Belgian soldiers retreating through the town. The story of this tragedy is told by the boy's mother, under oath, before the Belgian Commission, and is so simple, so touching, so convincing in its verisimilitude, that I attach a copy of it in extenso to this report. It seems to afford an altogether typical example of what went on all over the stricken land during those days of terror. (In other places it was the daughter of the burgomaster who was said to have shot a general.)

“The following facts may be noted: From the avowal of Prussian officers themselves, there was not one single victim, among their men at the barracks of St. Martin, Louvain, where it was claimed that the first shot had been fired from a house situated in front of the Caserne. This would appear to be impos-

sible had the civilians fired upon them point blank from across the street. It was said that when certain houses near the barracks were burning, numerous explosions occurred, revealing the presence of cartridges; but these houses were drinking houses much frequented by German soldiers. It was said that Spanish students shot from the schools in the Rue de la Station, but Father Catala, rector of the school, affirms that the schools were empty. . . .

“If it was necessary, for whatever reason, to do what was done at Vise, at Dinant, at Aerschot, at Louvain, and in a hundred other towns that were sacked, pillaged and burned, where masses were shot down because civilians had fired on German troops, and if it was necessary to do this on a scale never before witnessed in history, one might not unreasonably assume that the alleged firing by civilians was done on a scale, if not so thoroughly organized, at least somewhat in proportion to the rage of destruction that punished it. And hence it would seem to be a simple matter to produce at least convincing evidence that civ-

ilians had fired on the soldiers; but there is no testimony to that effect beyond that of the soldiers who merely assert it: *Man hat geschossen*. If there were no more firing on soldiers by civilians in Belgium than is proved by the German testimony, it was not enough to justify the burning of the smallest of the towns that was overtaken by that fate. And there is not a scintilla of evidence of organized bands of francs-tireurs, such as were found in the war of 1870."

Under date of September 12, 1917, Minister Whitlock, in a report to the State Department of the United States, made the following summary: "As one studies the evidence at hand, one is struck at the outset by the fact so general that it must exclude the hypothesis of coincidence, and that is that these wholesale massacres followed immediately upon some check, some reverse, that the German army had sustained. The German army was checked by the guns of the forts to the east of Liège, and the horrors of Vise, Verviers, Bligny, Battice, Hervy and twenty vil-

*From a painting by F. Gueldry to illustrate an official report.*

#### GERMAN ATROCITIES

At Sedan, 14,000 prisoners of war on September 9, 1914. French soldiers with heads to be hit by French bullets. Many were killed and wounded. The townsman on the left was struck in the knee. A German soldier asked to see the wound and asked him to show it. On the right a German soldier is seen torturing a wounded French soldier by beating him in the face with a stick.

lages follow. When they entered Liége, they burned the houses along two streets and killed many persons, five or six Spaniards among them. Checked before Namur they sacked Andenne, Bauvignies, and Champignon, and when they took Namur they burned one hundred and fifty houses. Compelled to give battle to the French army in the Belgian Ardennes they ravaged the beautiful valley of the Semois; the complete destruction of the village of Rossignlo and the extermination of its entire male population took place there. Checked again by the French on the Meuse, the awful carnage of Dinant results. Held on the Sambre by the French, they burn one hundred houses at Charleroi and enact the appalling tragedy of Tamines. At Mons, the English hold them, and after that all over the Borinage there is a systematic destruction, pillage and murder. The Belgian army drive them back from Malines and Louvain is doomed. The Belgian army falling back and fighting in retreat took refuge in the forts of Antwerp, and the burning and sack of Hou-

gaerde, Wavre, Ottignies, Grimde, Neerlinter, Weert, St. George, Shaffen and Aerschot follow.

“The Belgian troops inflicted serious losses on the Germans in the South of the Province of Limbourg and the towns of Lummen, Bilsen, and Lanaeken are partially destroyed. Antwerp held out for two months, and all about its outer line of fortifications there was blood and fire, numerous villages were sacked and burned and the whole town of Termonde was destroyed. During the battles of September the village of Boortmeerbeek near Malines, occupied by the Germans, was retaken by the Belgians, and when the Germans entered it again they burned forty houses. Three times occupied by the Belgians and retaken by the Germans Boortmeerbeek was three times punished in the same way. That is to say, everywhere the German army met with a defeat it took it out, as we say in America, on the civil population. And that is the explanation of the German atrocities in Belgium.”

A committee of the highest honor and re-

sponsibility was appointed by the British Government to investigate the whole subject of atrocities in Belgium and Northern France. Its chairman was the Rt. Hon. Viscount James Bryce, formerly British Ambassador to the United States. Its other members were the Rt. Hon. Sir Frederick Pollock, the Rt. Hon. Sir Edward Clark, Sir Alfred Hopkinson, Mr. H. A. L. Fisher, Vice-Chancellor of the University of Sheffield, Mr. Harold Cox and Sir Kenelm E. Digby.

The report of the commission bears upon its face the stamp of painstaking search for truth, substantiates every statement made by Minister Whitlock and makes known many horrible instances of cruelty and barbarity. It makes the following deductions as having been proved beyond question:

1. That there were in many parts of Belgium deliberate and systematically organized massacres of the civil population, accompanied by many isolated murders and other outrages.

2. That in the conduct of the war generally innocent civilians, both men and women, were

murdered in large numbers, women violated, and children murdered.

3. That looting, house burning, and the wanton destruction of property were ordered and countenanced by the officers of the German army, that elaborate provision had been made for systematic incendiarism at the very outbreak of the war, and that the burnings and destruction were frequent where no military necessity could be alleged, being, indeed, part of a system of general terrorization.

4. That the rules and usages of war were frequently broken, particularly by the using of civilians, including women and children, as a shield for advancing forces exposed to fire, to a less degree by killing the wounded and prisoners and in the frequent abuse of the Red Cross and the white flag.

The Bryce Commission's report on the destruction of Dinant is an example of testimony laid before them. It follows:

"A clear statement of the outrages at Dinant, which many travelers will recall as a singularly picturesque town on the Meuse, is

given by one witness, who says that the Germans began burning houses in the Rue St. Jacques on the 21st of August, and that every house in the street was burned. On the following day an engagement took place between the French and the Germans, and the witness spent the whole day in the cellar of a bank with his wife and children. On the morning of the 23d, about 5 o'clock, firing ceased, and almost immediately afterward a party of Germans came to the house. They rang the bell and began to batter at the door and windows. The witness' wife went to the door and two or three Germans came in. The family were ordered out into the street. There they found another family, and the two families were driven with their hands above their heads along the Rue Grande. All the houses in the street were burning.

"The party was eventually put into a forge where there were a number of other prisoners, about a hundred in all, and were kept there from 11 A. M. till 2 P. M. They were then taken to the prison. There they were assem-

bled in a courtyard and searched. No arms were found. They were then passed through into the prison itself and put into cells. The witness and his wife were separated from each other. During the next hour the witness heard rifle shots continually and noticed in the corner of a court-yard leading off the row of cells the body of a young man with a mantle thrown over it. He recognized the mantle as having belonged to his wife. The witness' daughter was allowed to go out to see what had happened to her mother, and the witness himself was allowed to go across the courtyard half an hour afterward for the same purpose. He found his wife lying on the floor in a room. She had bullet wounds in four places but was alive and told her husband to return to the children and he did so.

“About 5 o'clock in the evening, he saw the Germans bringing out all the young and middle-aged men from the cells, and ranging their prisoners, to the number of forty, in three rows in the middle of the courtyard. About twenty Germans were drawn up opposite, but before

anything was done there was a tremendous fusillade from some point near the prison and the civilians were hurried back to their cells. Half an hour later the same forty men were brought back into the courtyard. Almost immediately there was a second fusillade like the first and they were driven back to the cells again.

“About 7 o’clock the witness and other prisoners were brought out of their cells and marched out of the prison. They went between two lines of troops to Roche Bayard, about a kilometer away. An hour later the women and children were separated and the prisoners were brought back to Dinant passing the prison on their way. Just outside the prison, the witness saw three lines of bodies which he recognized as being those of his neighbors. They were nearly all dead, but he noticed movement in some of them. There were about one hundred and twenty bodies. The prisoners were then taken up to the top of a hill outside Dinant and compelled to stay there till 8 o’clock in the morning. On the following

day they were put into cattle trucks and taken thence to Coblenz. For three months they remained prisoners in Germany.

“Unarmed civilians were killed in masses at other places near the prison. About ninety bodies were seen lying on the top of one another in a grass square opposite the convent. A witness asked a German officer why her husband had been shot, and he told her that it was because two of her sons had been in the civil guard and had shot at the Germans. As a matter of fact, one of her sons was at that time in Liège and the other in Brussels. It is stated that besides the ninety corpses referred to above, sixty corpses of civilians were recovered from a hole in the brewery yard and that forty-eight bodies of women and children were found in a garden. The town was systematically set on fire by hand grenades. Another witness saw a little girl of seven, one of whose legs was broken and the other injured by a bayonet. We have no reason to believe that the civilian population of Dinant gave any provocation, or that any other defense can be put forward to

justify the treatment inflicted upon its citizens.”

The Bryce Commission reports the outrages in a number of Belgian villages in this terse fashion:

“In Hofstade a number of houses had been set on fire and many corpses were seen, some in houses, some in back yards, and some in the streets. Two witnesses speak of having seen the body of a young man pierced by bayonet thrusts with the wrists cut also. On a side road the corpse of a civilian was seen on his doorstep with a bayonet wound in his stomach and by his side the dead body of a boy of five or six with his hands nearly severed. The corpses of a woman and boy were seen at the blacksmith’s. They had been killed with the bayonet. In a café, a young man, also killed with the bayonet, was holding his hands together as if in the attitude of supplication.

“In the garden of a house in the main street, bodies of two women were observed, and in another house, the body of a boy of sixteen with two bayonet wounds in the chest. In Sempst a

similar condition of affairs existed. Houses were burning and in some of them were the charred remains of civilians. In a bicycle shop a witness saw the burned corpse of a man. Other witnesses speak of this incident. Another civilian, unarmed, was shot as he was running away. As will be remembered, all the arms had been given up ~~some~~ time before by the order of the burgomaster.

“At Weerde four corpses of civilians were lying in the road. It was said that these men had fired upon the German soldiers; but this is denied. The arms had been given up long before. Two children were killed in the village of Weerde, quite wantonly as they were standing in the road with their mother. They were three or four years old and were killed with the bayonet. A small barn burning close by formed a convenient means of getting rid of the bodies. They were thrown into the flames from the bayonets. It is right to add that no commissioned officer was present at the time. At Eppeghem, on August 25th, a pregnant woman who had been wounded with a bayonet

was discovered in the convent. She was dying. On the road six dead bodies of laborers were seen.

“At Boortmeerbeek a German soldier was seen to fire three times at a little girl five years old. Having failed to hit her, he subsequently bayoneted her. He was killed with the butt end of a rifle by a Belgian soldier who had seen him commit this murder from a distance. At Herent the charred body of a civilian was found in a butcher’s shop, and in a handcart twenty yards away was the dead body of a laborer. Two eye witnesses relate that a German soldier shot a civilian and stabbed him with a bayonet as he lay. He then made one of these witnesses, a civilian prisoner, smell the blood on the bayonet. At Haecht the bodies of ten civilians were seen lying in a row by a brewery wall. In a laborer’s house, which had been broken up, the mutilated corpse of a woman of thirty to thirty-five was discovered.”

Concerning the treatment of women and children in general, the report continues: “The evidence shows that the German author-

ities, when carrying out a policy of systematic arson and plunder in selected districts, usually drew some distinction between the adult male population on the one hand and the women and children on the other. It was a frequent practice to set apart the adult males of the condemned district with a view to the execution of a suitable number—preferably of the younger and more vigorous—and to reserve the women and children for milder treatment. The depositions, however, present many instances of calculated cruelty, often going the length of murder, toward the women and children of the condemned area.

“At Dinant sixty women and children were confined in the cellar of a convent from Sunday morning till the following Friday, August 28th, sleeping on the ground, for there were no beds, with nothing to drink during the whole period, and given no food until Wednesday, when somebody threw into the cellar two sticks of macaroni and a carrot for each prisoner. In other cases the women and children were marched for long distances along

roads, as, for instance, the march of the women from Louvain to Tirlemont, August 28th, the laggards pricked on by the attendant Uhlans. A lady complains of having been brutally kicked by privates. Others were struck at with the butt end of rifles. At Louvain, at Liège, at Aerschot, at Malines, at Montigny, at Andenne, and elsewhere, there is evidence that the troops were not restrained from drunkenness, and drunken soldiers cannot be trusted to observe the rules or decencies of war, least of all when they are called upon to execute a pre-ordained plan of arson and pillage. From the very first women were not safe. At Liège women and children were chased about the streets by soldiers.

“Witnesses recount how a great crowd of men, women and children from Aerschot were marched to Louvain, and then suddenly exposed to a fire from a mitrailleuse and rifles. ‘We were all placed,’ recounts a sufferer, ‘in Station Street, Louvain, and the German soldiers fired on us. I saw the corpses of some women in the street. I fell down, and a

woman who had been shot fell on top of me.' Women and children suddenly turned out into the streets, and, compelled to witness the destruction of their homes by fire, provided a sad spectacle to such as were sober enough to see.

"A humane German officer, witnessing the ruin of Aerschot, exclaimed in disgust: 'I am a father myself, and I cannot bear this. It is not war but butchery.' Officers as well as men succumbed to the temptation of drink, with results which may be illustrated by an incident which occurred at Campenhout. In this village there was a certain well-to-do merchant (name given) who had a cellar of good champagne. On the afternoon of the 14th or 15th of August three German cavalry officers entered the house and demanded champagne. Having drunk ten bottles and invited five or six officers and three or four private soldiers to join them, they continued their carouse, and then called for the master and mistress of the house.

" 'Immediately my mistress came in,' says the valet de chambre, 'one of the officers who

was sitting on the floor got up, and, putting a revolver to my mistress' temple, shot her dead. The officer was obviously drunk. The other officers continued to drink and sing, and they did not pay any great attention to the killing of my mistress. The officer who shot my mistress then told my master to dig a grave and bury my mistress. My master and the officer went into the garden, the officer threatening my master with a pistol. My master was then forced to dig the grave and to bury my mistress in it. I cannot say for what reason they killed my mistress. The officer who did it was singing all the time.'

"In the evidence before us there are cases tending to show that aggravated crimes against women were sometimes severely punished. One witness reports that a young girl who was being pursued by a drunken soldier at Louvain appealed to a German officer, and that the offender was then and there shot. Another describes how an officer of the Thirty-second Regiment of the Line was led out to execution for the violation of two young girls, but re-

prievied at the request or with the consent of the girls' mother. These instances are sufficient to show that the maltreatment of women was no part of the military scheme of the invaders, however much it may appear to have been the inevitable result of the system of terror deliberately adopted in certain regions. Indeed, so much is avowed. 'I asked the commander why we had been spared,' says a lady in Louvain, who deposes to having suffered much brutal treatment during the sack. He said: 'We will not hurt you any more. Stay in Louvain. All is finished.' It was Saturday, August 29th, and the reign of terror was over.

"The Germans used men, women and children of Belgium as screens for advancing infantry, as is shown in the following: Outside Fort Fleron, near Liége, men and children were marched in front of the Germans to prevent the Belgian soldiers from firing. The progress of the Germans through Mons was marked by many incidents of this character. Thus, on August 22d, half a dozen Belgian col-

liers returning from work were marching in front of some German troops who were pursuing the English, and in the opinion of the witnesses, they must have been placed there intentionally. An English officer describes how he caused a barricade to be erected in a main thoroughfare leading out of Mons, when the Germans, in order to reach a crossroad in the rear, fetched civilians out of the houses on each side of the main road and compelled them to hold up white flags and act as cover.

“Another British officer who saw this incident is convinced that the Germans were acting deliberately for the purpose of protecting themselves from the fire of the British troops. Apart from this protection, the Germans could not have advanced, as the street was straight and commanded by the British rifle fire at a range of 700 or 800 yards. Several British soldiers also speak of this incident, and their story is confirmed by a Flemish witness in a side street.”

The French Government also appointed a commission, headed by M. Georges Payelle.

This body made an investigation of outrages committed by German officers and soldiers in Northern France. Its report showed conditions that outstripped in horror the war tactics of savages. It makes the following accusations:

“In Rebais, two English cavalymen who were surprised and wounded in this commune were finished off with gunshots by the Germans when they were dismounted and when one of them had thrown up his hands, showing thus that he was unarmed.

“In the department of the Marne, as everywhere else, the German troops gave themselves up to general pillage, which was carried out always under similar conditions and with the complicity of their leaders. The Communes of Heiltz-le-Maurupt, Suippes, Marfaux, Fromentieres and Esternay suffered especially in this way. Everything which the invader could carry off from the houses was placed on motor lorries and vehicles. At Suippes, in particular, they carried off in this way a quantity of different objects, among these sewing

machines and toys. A great many villages, as well as important country towns, were burned without any reason whatever. Without doubt, these crimes were committed by order, as German detachments arrived in the neighborhood with their torches, their grenades, and their usual outfit for arson.

“At Marfaux nineteen private houses were burned. Of the Commune of Glannes practically nothing remains. At Somme-Tourbe the entire village has been destroyed, with the exception of the Mairie, the church and two private buildings. At Aube nearly the whole town has been destroyed. At Etrepy sixty-three families out of seventy are homeless. At Huiron all of the houses, with the exception of five had been burned. At Sermaize-les-Bains only about forty houses out of 900 remain. At Bignicourt-sur-Saultz thirty houses out of thirty-three are in ruins.

“At Suippes, the big market town which has been practically burned out, German soldiers carrying straw and cans of petrol have been seen in the streets. While the mayor’s house

was burning, six sentinels with fixed bayonets were under orders to forbid any one to approach and to prevent any help being given.

“All this destruction by arson, which only represents a small proportion of the acts of the same kind in the Department of Seine-et-Marne, was accomplished without the least tendency to rebellion or the smallest act of resistance being recorded against the inhabitants of the localities which are today more or less completely destroyed. In some villages the Germans, before setting fire to them, made one of their soldiers fire a shot from his rifle so as to be able to pretend afterward that the civilian population had attacked them, an allegation which is all the more absurd since at the time when the enemy arrived, the only inhabitants left were old men, sick persons, or people absolutely without any means of aggression.

“Numerous crimes against the person have also been committed. In the majority of the communes hostages have been taken away; many of them have not returned. At Sermaize-les-Bains, the Germans carried off about

one hundred and fifty people, some of whom were decked out with helmets and coats and compelled, thus equipped, to mount guard over the bridges.

“At Bignicourt-sur-Saultz thirty men and forty-five women and children were obliged to leave with a detachment. One of the men—a certain Emile Pierre—has not returned nor sent any news of himself. At Corfelix, M. Jacquet, who was carried off on the 7th of September with eleven of his fellow-citizens, was found five hundred meters from the village with a bullet in his head.

“At Champuis, the curé, his maid-servant, and four other inhabitants who were taken away on the same day as the hostages of Corfelix had not returned at the time of our visit to the place.

“At the same place an old man of seventy, named Jacquemin, was tied down in his bed by an officer and left in this state without food for three days. He died a little time after. At Vert-la-Gravelle a farm hand was killed. He was struck on the head with a bottle and his

chest was run through with a lance. The garde champetre Brulefer of le Gault-la-Forêt was murdered at Maclaunay, where he had been taken by the Germans. His body was found with his head shattered and a wound on his chest.

“At Champguyon, a commune which has been fired, a certain Verdier was killed in his father-in-law’s house. The latter was not present at the execution, but he heard a shot and next day an officer said to him, ‘Son shot. He is under the ruins.’ In spite of the search made the body has not been found among them. It must have been consumed in the fire.

“At Sermaize, the roadmaker, Brocard, was placed among a number of hostages. Just at the moment when he was being arrested with his son, his wife and his daughter-in-law in a state of panic rushed to throw themselves into the Saulx. The old man was able to free himself for a moment and ran in all haste after them and made several attempts to save them, but the Germans dragged him away pitilessly, leaving the two wretched women struggling in

**THE SUPREME EXPONENTS OF GERMAN FRIGHTFULNESS**

On the left, General von Bissing, military commander of Belgium. On the right, Grand Admiral von Tirpitz, who inspired the German submarine campaign.

the river. When Brocard and his son were restored to liberty, four days afterward, and found the bodies, they discovered that their wives had both received bullet wounds in the head.

“At Triaucourt the Germans gave themselves up to the worst excesses. Angered doubtless by the remark which an officer had addressed to a soldier, against whom a young girl of nineteen, Mlle. Helene Proces, had made complaint on account of the indecent treatment to which she had been subjected, they burned the village and made a systematic massacre of the inhabitants. They began by setting fire to the house of an inoffensive householder, M. Jules Gand, and by shooting this unfortunate man as he was leaving his house to escape the flames. Then they dispersed among the houses in the streets, firing off their rifles on every side. A young man, seventeen years, Georges Lecourtier, who tried to escape was shot. M. Alfred Lallemand suffered the same fate. He was pursued into the kitchen of his fellow-citizen Tautelier, and murdered there,

while Tautelier received three bullets in his hand.

“Fearing, not without reason, for their lives, Mlle. Proces, her mother and her grandmother of seventy-one and her old aunt of eighty-one, tried to cross the trellis which separates their garden from a neighboring property with the help of a ladder. The young girl alone was able to reach the other side and to avoid death by hiding in the cabbages. As for the other women, they were struck down by rifle shots. The village curé collected the brains of the aunt on the ground on which they were strewn and had the bodies carried into Proces’ house. During the following night, the Germans played the piano near the bodies.

“While the carnage raged, the fire rapidly spread and devoured thirty-five houses. An old man of seventy and a child of two months perished in the flames. M. Igier, who was trying to save his cattle, was pursued for 300 meters by soldiers, who fired at him ceaselessly. By a miracle this man had the good fortune not

to be wounded, but five bullets went through his clothing."

This summary merely hints at the atrocities that were perpetrated. And these are the crimes that France and Belgium will remember after indemnities have been paid, after borders have been re-established and after generations shall have passed. The horrors of blazing villages, of violated womanhood, of mutilated childhood, of stark and senseless butcheries, will flash before the minds of French and Belgian men and women when Germany's name shall be mentioned long after the declaration of peace.

*Schrecklichkeit* had its day. It took its bloody toll of the fairest and bravest of two gallant nations. It ravaged Poland as well and wreaked its fiendish will on wounded soldiers on the battle-fields.

But *Schrecklichkeit* is dead. Belgium and France have shown that murder and rape and arson can not destroy liberty nor check the indomitable ambitions of the free peoples of earth.

The lesson to Germany was taught at a terrible cost to humanity, but it was taught in a fashion that nations hereafter who shall dream of emulating the Hun will know in advance that frightfulness serves no end except to feed the lust for destruction that exists only in the most debased and brutish of men.

## CHAPTER VII

### THE FIRST BATTLE OF THE MARNE

FRANCE and civilization were saved by Joffre and Foch at the first battle of the Marne in August, 1914.

Autocracy was destroyed by Foch at the second battle of the Marne, 1918.

This in a nutshell embraces the dramatic opening and closing episodes of the World War on the soil of France. Bracketed between these two glorious victories were the agonies of martyred France, the deaths and life-longcripplings of millions of men, the up-rooting of arrogant militarism, the liberation of captive nations.

The first battle of the Marne was wholly a French operation. The British were close at hand, but had no share in the victory. Generals Gallieni and Manoury, acting under instructions from Marshal Joffre, were driven by

automobile to the headquarters of the British commander, Sir John French, in the village of Melun. They explained in detail General Joffre's plan of attack upon the advancing German army. An urgent request was made that the British army halt its retreat, face about, and attack the two corps of von Kluck's army then confronting the British. Simultaneously with this attack General Manoury's forces were to fall upon the flank and the rear guard of von Kluck along the River Ourcq. This operation was planned for the next day, September 5th. Sir John French replied that he could not get his tired army in readiness for battle within forty-eight hours. This would delay the British attack in all probability until September 7th.

Joffre's plan of battle, however, would admit of no delay. The case was urgent; there was grave danger of a union between the great forces headed by the Crown Prince and those under von Kluck. He resolved to go ahead without the British, and ordered Manoury to strike as had been planned.

He fixed as an extreme limit for the movement of retreat, which was still going on, the line of Bray-sur-Seine, Nogent-sur-Seine, Arcis-sur-Aube, Vitry-le-François, and the region to the north of Bar-le-Duc. This line might be reached if the troops were compelled to go back so far. They would attack before reaching it, as soon as there was a possibility of bringing about an offensive disposition, permitting the co-operation of the whole of the French forces.

On September 5 it appeared that this desired situation existed.

The First German army, carrying audacity to temerity, had continued its endeavor to envelop the French left, had crossed the Grand Morin, and reached the region of Chauffry, to the south of Rebais and of Esternay. It aimed then at cutting Joffre off from Paris, in order to begin the investment of the capital.

The Second army had its head on the line Champaubert, Etoges, Bergères, and Vertus.

The Third and Fourth armies reached to Châlons-sur-Marne and Bussy-le-Répos. The

Fifth army was advancing on one side and the other from the Argonne as far as Triacourtles-Islettes and Juivecourt. The Sixth and Seventh armies were attacking more to the east.

THE FIRST GERMAN DASH FOR PARIS

The French left army had been able to occupy the line Sezanne, Villers-St. Georges and Courchamps. This was precisely the disposition which the General-in-Chief had wished to see achieved. On the 4th he decided to take

**GENERAL PERSHING AND MARSHAL JOFFRE**

The Commander-in-Chief of the American Expeditionary Forces chatting with the veteran Marshal of France, the hero of the first battle of the Marne.

advantage of it, and ordered all the armies to hold themselves ready. He had taken from his right two new army corps, two divisions of infantry, and two divisions of cavalry, which were distributed between his left and his center.

On the evening of the 5th he addressed to all the commanders of armies a message ordering them to attack.

"The hour has come," he wrote, "to advance at all costs, and to die where you stand rather than give way."

If one examines the map, it will be seen that by his inflection toward Meaux and Coulommiers General von Kluck was exposing his right to the offensive action of the French left. This is the starting point of the victory of the Marne.

On the evening of September 5th the French left army had reached the front Penchard-Saint-Soufflet-Ver. On the 6th and 7th it continued its attacks vigorously with the Ourcq as objective. On the evening of the 7th it was some kilometers from the Ourcq, on

the front Chambry-Marcilly-Lisieux-Acy-en-Multien. On the 8th, the Germans, who had in great haste reinforced their right by bringing their Second and Fourth army corps back to the north, obtained some successes by attacks of extreme violence. But in spite of this pressure the French held their ground. In a brilliant action they took three standards, and being reinforced prepared a new attack for the 10th. At the moment that this attack was about to begin the enemy was already in retreat toward the north. The attack became a pursuit, and on the 12th the French established themselves on the Aisne.

Why did the German forces which were confronting the French, and on the evening before attacking so furiously, retreat on the morning of the 10th? Because in bringing back on the 6th several army corps from the south to the north to face the French left, the enemy had exposed his left to the attacks of the now rested British, who had immediately faced around toward the north, and to those of the French armies which were prolonging the

English lines to the right. This is what the French command had sought to bring about. This is what happened on September 8th and allowed the development and rehabilitation which it was to effect.

On the 6th the British army set out from the line Rozcy-Langny and that evening reached the southward bank of the Grand Morin. On the 7th and 8th it continued its march, and on the 9th had debouched to the north of the Marne below Château-Thierry—the town that was to become famous for the American stand in 1918—taking in flank the German forces which on that day were opposing, on the Ourcq, the French left army. Then it was that these forces began to retreat, while the British army, going in pursuit and capturing seven guns and many prisoners, reached the Aisne between Soissons and Longueval.

The rôle of the French army, which was operating to the right of the British army, was threefold. It had to support the British attacking on its left. It had on its right to support the center, which, from September 7th,

had been subjected to a German attack of great violence. Finally, its mission was to throw back the three active army corps and the reserve corps which faced it.

On the 7th, it made a leap forward, and on the following days reached and crossed the Marne, seizing, after desperate fighting, guns, howitzers, mitrailleuses, and a million cartridges. On the 12th it established itself on the north edge of the Montagne-de-Reime in contact with the French center, which for its part had just forced the enemy to retreat in haste.

The French center consisted of a new army created on August 29th and of one of those which at the beginning of the campaign had been engaged in Belgian Luxemburg. The first had retreated, on August 29th to September 5th, from the Aisne to the north of the Marne and occupied the general front Sezanne-Mailly.

The second, more to the east, had drawn back to the south of the line Humbauville-

Château - Beauchamp - Bignicourt - Blesmes - Maurupt-le-Montoy.

The enemy, in view of his right being arrested and the defeat of his enveloping movement, made a desperate effort from the 7th to the 19th to pierce the French center to the west and to the east of Fere-Champenoise. On the 8th he succeeded in forcing back the right of the new French army, which retired as far as Gouragançon. On the 9th, at 6 o'clock in the morning, there was a further retreat to the south of that village, while on the left the other army corps also had to go back to the line Allemant-Connantre.

Despite this retreat General Foch, commanding the army of the center, ordered a general offensive for the same day. With the Morocco division, whose behavior was heroic, he met a furious assault of the Germans on his left toward the marshes of Saint Gond. Then with the divisions which had just victoriously overcome the attacks of the enemy to the north of Sezanne, and with the whole of his left army

corps, he made a flanking attack in the evening of the 9th upon the German forces, and notably the guard, which had thrown back his right army corps. The enemy, taken by surprise by this bold maneuver, did not resist, and beat a hasty retreat. This marked Foch as the most daring and brilliant strategist of the war.

On the 11th the French crossed the Marne between Tours-sur-Marne and Sarry, driving the Germans in front of them in disorder. On the 12th they were in contact with the enemy to the north of the Champ de Châlons. The reserve army of the center, acting on the right of the one just referred to, had been intrusted with the mission during the 7th, 8th, and 9th of disengaging its neighbor, and it was only on the 10th that being reinforced by an army corps from the east, it was able to make its action effectively felt. On the 11th the Germans retired. But, perceiving their danger, they fought desperately, with enormous expenditure of projectiles, behind strong intrenchments. On the 12th the result had none

**MARSHAL FERDINAND FOCH, COMMANDER-IN-CHIEF OF THE ALLIED ARMIES**

The crushing defeat of the armies of the Central Powers is due in large measure to the remarkable strategy and superb leadership of this great French soldier.

the less been attained, and two French center armies were solidly established on the ground gained.

To the right of these two armies were three others. They had orders to cover themselves to the north and to debouch toward the west on the flank of the enemy, which was operating to the west of the Argonne. But a wide interval in which the Germans were in force separated them from the French center. The attack took place, nevertheless, with very brilliant success for the French artillery, which destroyed eleven batteries of the Sixteenth German army corps.

On the 10th inst., the Eighth and Fifteenth German army corps counter-attacked, but were repulsed. On the 11th French progress continued with new successes, and on the 12th the French were able to face round toward the north in expectation of the near and inevitable retreat of the enemy, which, in fact, took place from the 13th.

The withdrawal of the mass of the German force involved also that of the left. From the

12th onward the forces of the enemy operating between Nancy and the Vosges retreated in a hurry before the two French armies of the East, which immediately occupied the positions that the enemy had evacuated. The offensive of the French right had thus prepared and consolidated in the most useful way the result secured by the left and center.

Such was this seven days' battle, in which more than two millions of men were engaged. Each army gained ground step by step, opening the road to its neighbor, supported at once by it, taking in flank the adversary which the day before it had attacked in front, the efforts of one articulating closely with those of the other, a perfect unity of intention and method animating the supreme command.

To give this victory all its meaning it is necessary to add that it was gained by troops which for two weeks had been retreating, and which, when the order for the offensive was given, were found to be as ardent as on the first day. It has also to be said that these troops had to meet the whole German army. Under their

pressure the German retreat at certain times had the appearance of a rout.

In spite of the fatigue of the poilus, in spite of the power of the German heavy artillery, the French took colors, guns, mitrailleuses, shells, and thousands of prisoners. One German corps lost almost the whole of its artillery.

In that great battle the spectacular rush of General Gallieni's army defending Paris, was one of the dramatic surprises that decided the issue. In that stroke Gallieni sent his entire force forty miles to attack the right wing of the German army. In this gigantic maneuver every motor car in Paris was utilized, and the flying force of Gallieni became the "Army in Taxicabs," a name that will live as long as France exists.

General Clergerie, Chief of Staff of Gallieni, told the story for posterity. He said:

"From August 26, 1914, the German armies had been descending upon Paris by forced marches. On September 1st they were only three days' march from the advanced line of the intrenched camp, which the garrison were

laboring desperately to put into condition for defense. It was necessary to cover with trenches a circuit of 110 miles, install siege guns, assure the coming of supplies for them over narrow-gauge railways, assemble the food and provisions of all kinds necessary for a city of 4,000,000 inhabitants.

“But on September 3rd, the intelligence service, which was working perfectly, stated about the middle of the day, that the German columns, after heading straight for Paris, were swerving toward the south-east and seemed to wish to avoid the fortified camp.

“General Gallieni and I then had one of those long conferences which denoted grave events; they usually lasted from two to five minutes at most. The fact is that the military government of Paris did little talking—it acted. The conference reached this conclusion: ‘If they do not come to us, we will go to them with all the force we can muster.’ Nothing remained but to make the necessary preparations. The first thing to do was not to give

the alarm to the enemy. General Manoury's army immediately received orders to lie low and avoid any engagement that was not absolutely necessary." Then care was taken to reinforce it by every means. All was ready at the designated time.

In the night of September 3rd, knowing that the enemy would have to leave only a rear guard on one bank of the Ourcq, General Gallieni and General Clergerie decided to march against that rear guard, to drive it back with all the weight of the Manoury army, to cut the enemy's communications, and take full advantage of his hazardous situation. Immediately the following order was addressed to General Manoury:

Because of the movement of the German armies, which seem to be slipping in before our front to the southeast, I intend to send your army to attack them in the flank, that is to say, in an easterly direction. I will indicate your line of march as soon as I learn that of the British army. But make your arrangements now so that your troops shall be ready to march this afternoon and to begin a general movement east of the intrenched camp tomorrow.

At ten in the morning a consultation was held by Generals Gallieni, Clergerie, and Manoury, and the details of the plan of operations were immediately decided. General Joffre gave permission to attack and announced that he would himself take the offensive on the 6th. On the 5th, at noon, the army from Paris fired the first shot; the battle of the Ourcq, a preface to the Marne, had begun.

General Clergerie then told what a precious purveyor of information he had found in General von der Marwitz, cavalry commander of the German first army, who made intemperate use of the wireless telegraph and did not even take the trouble to put into cipher his dispatches, of which the Eiffel Tower made a careful collection. "In the evening of September 9th," he said, "an officer of the intelligence corps brought me a dispatch from this same Marwitz couched in something like these terms: 'Tell me exactly where you are and what you are doing. Hurry up, because XXX.' The officer was greatly embarrassed to interpret those three X's. Adopting the

language of the poilu, I said to him, 'Translate it, "I am going to bolt." ' True enough, next day we found on the site of the German batteries, which had been precipitately evacuated, stacks of munitions; while by the roadside we came upon motors abandoned for the slightest breakdown, and near Betz almost the entire outfit of a field bakery, with a great store of flour and dough half-kneaded. Paris and France were saved.

"Von Kluck could not get over his astonishment. He has tried to explain it by saying he was unlucky, for out of a hundred Governors not one would have acted as Gallieni did, throwing his whole available force nearly forty miles from his stronghold. It was downright imprudence."

## CHAPTER VIII

### JAPAN IN THE WAR

ON August 15, 1914, the Empire of Japan issued an ultimatum to Germany. She demanded the evacuation of Tsing-tau, the disarming of the warships there and the handing over of the territory to Japan for ultimate reversion to China. The time limit for her reply was set at 12 o'clock, August 24th. To this ultimatum Germany made no reply, and at 2:30 P. M., August 23d, the German Ambassador was handed his passports and war was declared.

The reason for the action of Japan was simple. She was bound by treaty to Great Britain to come to her aid in any war in which Great Britain might be involved. On August 4th a note was received from Great Britain requesting Japan to safeguard British shipping in the Far East. Japan replied that she could

not guarantee the safety of British shipping so long as Germany was in occupation of the Chinese province of Tsing-tau. She suggested in turn that England agree to allow her to remove this German menace. The British Government agreed, on the condition that Tsing-tau be subsequently returned to China.

The Japanese Government in taking this stand was acting with courage and with loyalty. Toward individual Germans she entertained no animosity. She had the highest respect for German scholarship and German military science. She had been sending her young men to German seats of learning, and had based the reorganization of her army upon the German military system. But she did not believe that a treaty was a mere "scrap of paper," and was determined to fulfil her obligations in the treaty with England.

It seems to have been the opinion of the highest Japanese military authorities that Germany would win the war. Japan's statesmen, however, believed that Germany was a menace to both China and Japan and had lively recol-

lections of her unfriendly attitude in connection with the Chino-Japanese war and in the period that followed. Germany had been playing the same game in China that she had played in the Mediterranean and which had ultimately brought about the war.

The Chino-Japanese war had been a great Japanese triumph. One of Japan's greatest victories had been the capture of Port Arthur, but the joy caused in Japan had not ended before it was into mourning because of German interference. Germany had then compelled Japan to quit Port Arthur, and to hand over that great fort to Russia so that she herself might take Kiao-chau without Russia's objection.

Japan had never forgotten or forgiven. The German seizure of Kiao-chau had led to the Russian occupation of Port Arthur, the British occupation of Wei-hai-wei and French occupation of Kwan-chow Bay. The vultures were swooping down on defenseless China. This had led to the Boxer disturbance of 1910, where again the Kaiser had interfered.

Japan, who recognized that her interests and safety were closely allied with the preservation of the territorial integrity of China, had proposed to the powers that she be permitted to send her troops to the rescue of the beleaguered foreigners, but this proposition was refused on account of German suspicion of Japan's motives. Later on, during the Russo-Japanese war, Russia was assisted in many ways by the German Government.

Furthermore, the popular sympathy with the Japanese was strongly with the Allies. It was the Kaiser who started the cry of the "yellow peril," which had deeply hurt Japanese pride. Yet, even with this strong feeling, it was remarkable that Japan was willing to ally herself with Russia. She knew very well that after all the greatest danger to her liberties lay across the Japan Sea. Russian autocracy, with its militarism, its religious intolerance, its discriminating policy against foreign interests in commerce and trade, was the natural opponent of liberal Japan.

The immediate object of Japan in joining

hands with England was to destroy the German menace in the Pacific. Before she delivered her ultimatum the Germans had been active; ignoring the rights of Japan while she was still neutral they had captured a Russian steamer within Japanese jurisdiction, as well as a number of British merchant vessels, and even a few Japanese ships had been intercepted by German cruisers. This was the disturbance to general peace in the Far East, which had prompted England to request Japan's assistance.

Japan, when she entered the war, was at least twice as strong as when she began the war with Russia. She had an army of one million men, and a navy double the size of that which she had possessed when the Treaty of Portsmouth was signed. As soon as war was declared she proceeded to act. A portion of her fleet was directed against the German forces in the Pacific, one squadron occupying Jaluit, the seat of government of the Marshall Islands, on October 3d, but her main forces were directed against the fortress of Tsing-tau.

The Germans had taken great pride in Tsing-tau, and had made every effort to make it a model colony as well as an impregnable fortress. They had built costly water works, fine streets and fine public buildings. They had been making great preparations for a state of siege, although it was not expected that they would be able to hold out for a long time. There were hardly more than five thousand soldiers in the fortress, and in the harbor but four small gunboats and an Austrian cruiser, the Kaiserin Elizabeth. As Austria was not at war with Japan the authorization of Japan was asked for the removal of the Kaiserin Elizabeth to Shanghai, where she could be interned. The Japanese were favorable to this proposition, but at the last moment instructions arrived from Vienna directing the Austro-Hungarian Ambassador to ask for his passports at Tokio and the commander of the Kaiserin Elizabeth to assist the Germans in the defense of Tsing-tau. The Germans also received orders to defend their fortress to the very last. A portion of the German squad-

ron, under Admiral von Spee, had sailed away before the Japanese attack, one of these being the famous commerce raider, the Emden.

On the 27th of August the Japanese made their first move by taking possession of some of the small islands at the mouth of the harbor of Kiao-chau. From these points as bases they swept the surrounding waters for mines, with such success that during the whole siege but one vessel of their fleet was injured by a mine. On the 2d of September they landed troops at the northern base of the peninsula upon which Tsing-tau was situated, with the object of cutting off the fortress from the mainland.

The heavy rains which were customary at that season prevented much action, but airplanes were sent which dropped bombs upon the wireless station, electric power station and railway station of Kiao-chau, and upon the ships in the harbor. On September 13th General Kamio captured the railway station of Kiao-chau which stands at the head of the bay. This placed him twenty-two miles from Tsing-

tau itself. On September 27th he captured Prince Heinrich Hill, giving him a gun position from which he could attack the inner forts. On the 23d a small British force arrived from

THE GERMAN GIBRALTAR IN THE FAR EAST WHICH FELL TO THE JAPANESE

Wei-hai-wei to co-operate with the Japanese.

The combined forces then advanced until they were only five miles from Tsing-tau. The German warships were bombarding the

Japanese troops fiercely, and were being replied to by the Japanese squadron in the mouth of the harbor. The great waste of German ammunition led General Kamio to the opinion that the Germans did not contemplate a long siege. He then determined on a vigorous assault.

Before the attack was made he gave the non-combatants an opportunity of leaving, and on the 15th of October a number of women and children and Chinese were allowed to pass through the Japanese lines. On October 31st the bombardment began, and the German forts were gradually silenced. On November 2d the Kaiserin Elizabeth was sunk in the harbor.

The Allied armies were pushing their way steadily down, until, on November 6th, their trenches were along the edge of the last German redoubts. At 6 o'clock on that day white flags were floating over the central forts and by 7.30 Admiral Waldeck, the German Governor, had signed the terms of capitulation.

Germany's prize colony on the continent of

Asia had disappeared. The survivors, numbering about three thousand, were sent to Japan as prisoners of war. Japanese losses were but two hundred and thirty-six men killed. They had, however, lost one third-class cruiser, the *Takachiho*, and several smaller crafts. The whole expedition was a notable success. It had occupied much less time than either Japan or Germany had expected, and the news was received in Germany with a universal feeling of bitterness and chagrin.

After the Japanese capture of *Kiao-chau* Japan's assistance to the Allies, while not spectacular, was extremely important, and its importance increased during the last two years of the war. Her cruiser squadrons did continuous patrol duty in the Pacific and in the China Sea and even in the Indian Ocean. She occupied three groups of German Islands in the South Sea, assisted in driving German raiders from the Pacific, and by her efficiency permitted a withdrawal of British warships to points where they could be useful nearer home. She patrolled the Pacific coast of North and

South America, landed marines to quell riots at Singapore, and finally entered into active service in European waters by sending a destroyer squadron to the assistance of the Allies in the Mediterranean.

The Japanese fleet was one of the strongest in the world. It had twenty-one first- and second-class cruisers, ten superb new destroyers, with a reserve of twenty others, as well as twenty battle-ships and battle cruisers.

One of Japan's most important contributions to the cause of the Allies was her assistance in convoying to Europe the Anzac troops, and it was because of the approach of her fleet that the German raiding squadron in the South Pacific was driven to the point near the Falkland Islands where it was destroyed by Admiral Cradock's British cruisers.

But while the aid of Japan's navy was important to the Allies, her greatest assistance to the Allied cause was what she did in supplying Russia with military supplies. The tremendous struggle carried on by Russia's

forces during the first years prevented an easy German victory, and was only made possible through the assistance of Japan. Enormous quantities of guns, ammunition, military stores, hospital and Red Cross supplies, were sent into Russia, with skilled officers and experts to accompany them. Before the Russian revolution disorganized Russia the total value of those supplies had reached \$250,000,000. This tremendous exportation, of course, enormously benefited Japan, but it was essential to Russia. Japan also shipped to both England and France vast quantities of flour, beans, peas and canned goods, and other supplies in proportion. Japan's financial aid was also of great value. She made great loans, to Russia \$60,000,000; to Great Britain \$50,000,000. She has become today a great workshop, and her merchant shipping has grown in proportion to the growth of her manufactures. Immense cargoes were moved, not only from Japan to Allied countries, but from the American seaboard to Vladivostock. More than one hun-

dred thousand Chinese laborers were put at the service of the Allies in France and England, and a great part of her magnificent merchant fleet was sent as a reinforcement to the merchant fleets of the Atlantic powers when they had been depleted by the attacks of the German submarines.

In the last year of the war Japan once more came prominently in the public eye in connection with the effort made by the Allies to protect from the Russian Bolsheviki vast stores of ammunition which had been landed in ports of Eastern Siberia. She was compelled to land troops to do this and to preserve order in localities where her citizens were in danger. Upon the development of the Czecho-Slovak movement in Eastern Siberia a Japanese force, in association with troops from the United States and Great Britain, was landed to protect the Czecho-Slovaks from Bolsheviki treachery. These troops succeeded in their object, and throughout the latter period of the war kept Eastern Siberia friendly to the Allied cause. In this campaign there was but little blood

shed. The expedition was followed by the strong sympathy of the allied world which was full of admiration for the loyalty and courage of the Czecho-Slovaks and their heroic leaders.

## CHAPTER IX

### CAMPAIGN IN THE EAST

**L**ONG before the declaration of war the German military experts had made their plans. They recognized that in case of war with Russia, France would come to the rescue of its ally. They hoped that Italy, and felt sure that England, would remain neutral, but, no doubt, had provided for the possibility that these two nations would join the ranks of their foes. They recognized that they would be compelled to fight against greatly superior numbers, but they had this advantage, that they were prepared to move at once, while England was unprepared, and Russia, with enormous numbers, was so unprovided with railroad facilities that it would take weeks before her armies would be dangerous.

Their plan of campaign, then, was obvious. Leaving in the East only such forces as were

necessary for a strong defense, they would throw the bulk of their strength against the French. They anticipated an easy march to Paris, and then with France at their mercy they would gather together all their powers and deal with Russia. But they had underestimated both the French power of resistance, and the Russian weakness, and in particular they had not counted upon the check that they were to meet with in gallant Belgium.

The Russian mobilization was quicker by far than had been anticipated. Her armies were soon engaged with the comparatively small German forces, and met with great success.

To understand the Russian campaign one must have some knowledge of the geography of western Russia. Russian Poland projects as a great quadrilateral into eastern Germany. It is bounded on the north by East Prussia, on the south by Galicia, and the western part reaches deep into Germany itself. The land is a broad, level plain, **through** which from south to north runs the River Vistula. In the center lies the capital, Warsaw, protected by

a group of fortresses. The Russian army, therefore, could not make a direct western advance until it had protected its flanks by the conquest of East Prussia on the north, and Galicia on the south.

By the beginning of the third week in August the first Russian armies were ready. Her forces were arranged as follows: Facing East Prussia was the Army of the Niemen, four corps strong; the Army of Poland, consisting of fifteen army corps, occupied a wide front from Narev on the north to the Bug Valley; a third army, the Army of Galicia, directed its line of advance southward into the country between Lemberg and the River Sareth. The fortresses protecting Warsaw, still further to the east, were well garrisoned, and in front of them to the west were troops intended to delay any German advance from Posen. The Russian commander-in-chief was the Grand Duke Nicholas, uncle of the late Czar, and one of the most admirable representatives of the Russian at his best; a splendid soldier, honest, straightforward, and patriotic, he was the idol

of his men. He had with him a brilliant staff, but the strength of his army lay in its experience. They had learned war in the bitter school of the Manchurian campaign.

The German force on the frontier was not less than five hundred thousand men, and they were arranged for defense. Austria, in Galicia, had gathered nearly one million men under the auspices of Frederiek. The first movement of these armies took place in East Prussia. The Army of the Niemen had completed its mobilization early in August, and was under the command of General Rennenkampf, one of the Russian leaders in Manchuria. In command of the German forces was General von François, an officer of Huguenot descent.

The first clash of these armies took place on the German frontier near Libau, on August 3d. Two days later, the Russians crossed the frontier, drove in the German advance posts, and seized the railway which runs south and east of the Masurian Lakes. The German force fell back, burning villages and destroying roads, according to their usual plan. On

the 7th of August the main army of Rennen-kampf crossed the border at Suwalki, advancing in two main bodies: the Army of the Niemén moving north from Suwalki, the Army of the Narev marching through the region of the Masurian lakes. In the lake district they advanced toward Boyen, and then directed their march toward Insterburg, the most important town in the neighborhood.

To protect Insterburg, General von François made his first stand at Gumbinnen, where, on the 16th of August, the first important battle of this campaign took place. The result was the defeat and retirement of the Germans, and von François was forced to fall back on Königsberg.

Meantime, the Army of the Narev, under General Samsonov, was advancing through the country west of the Masurian Lakes. On the 20th his vanguard came upon a German army corps, strongly entrenched at the northwest end of the lakes. The Germans were defeated, and fled in great disorder toward Königsberg, abandoning their guns and wagons. Many

### COSSACKS OF THE DON ATTACKING PRUSSIAN CAVALRY

In a fierce encounter near the Dnieper River the Russian horse men put to flight the Kaiser's best soldiers.

prisoners were taken, and the Russians found themselves masters of all of East Prussia except that inside the Koenigsberg line. They then marched on Koenigsberg, and East Prussia was for a moment at the mercy of the conqueror.

Troops were left to invest Koenigsberg, and East Prussia was overrun with the enemy. The report as to the behavior of these troops met with great indignation in Germany; but better information insists that they behaved with decorum and discretion. The peasantry of East Prussia, remembering wild tales of the Cossacks of a hundred years before, fled in confusion with stories of burning and slaughter and outrage.

Germany became aroused. To thoroughly understand the effect of the Russian invasion of east Prussia, one must know something of the relations of that district with the German Empire. Historically, this was the cradle of the Prussian aristocracy, whose dangerous policies had alarmed Europe for so many decades. The Prussian aristocracy originated in a mix-

ture of certain west German and Christian knights, with a pagan population of the eastern Baltic plain. The district was separate from Poland and never fell under the Polish influence. It was held by the Teutonic knights who conquered it in a sort of savage independence. The Christian faith, which the Teutonic knights professed to inculcate, took little root, but such civilization as Germany itself had absorbed did filter in. The chief noble of Borussia, the governing Duke, acquired in time the title of King, and it was here, not in Berlin, nor in Brandenburg, that the Hohenzollern power originated.

East Prussia, therefore, had a sentimental importance in the eyes of the Prussian nobility. The Prussian Royal House, in particular, had toward this country an especial regard. Moreover, it was regarded by the Germans as a whole as their rampart against the Slav, a proof of the German power to withstand the dreaded Russian. That this sacred soil should now be in the hands of a Cossack army was not to be borne. The Kaiser acted at once.

THE EASTERN FIGHTING ZONE

Large forces were detached from the west and sent to the aid of the eastern army. A new commander was appointed. He was General von Hindenburg, a veteran of the Franco-Prussian War who had been for some years retired. After his retirement he devoted his time to the study of East Prussia, especially the ground around the Masurian Lakes. He became more familiar with its roads, its fields, its marshes, its bogs than any of the peasants who spent their lives in the neighborhood of the lakes. Before his retirement, in the annual maneuvers, he had often rehearsed his defense against Russian invaders. Indeed report, perhaps unfounded, described his retirement to the displeasure of the Emperor William at being badly worsted in one of these mimic combats. He had prevented the country from being cleared and the swamps from being drained, arguing that they were worth more to Germany than a dozen fortresses. A man of rugged strength, his face suggesting power and tenacity, he was to become the idol of the German people.

His chance had come. His army consisted of remnants of the forces of von François and large reinforcements sent him from the west. In all, perhaps, he had with him 150,000 men, and he had behind him an admirable system of strategic railways.

The Russian High Command was full of confidence. Rennenkampf had advanced with the army of the Niemen toward Königsberg, whose fall was reported from time to time, without foundation. Königsberg was in fact impregnable to armies no stronger than those under Rennenkampf's command. Samsonov with the Army of the Narev, had pushed on to the northeastern point of the lakes, and defeated the German army corps at Frankenau. Misled by his success, he decided to continue his advance through the lake region toward Allenstein. He marched first toward Osterode, in the wilderness of forest, lake and marsh, between Allenstein and the Lower Vistula. His force numbered 200,000 men, but the swamps made it impossible to proceed in mass. His column had to be temporarily divided, nor

was he well informed as to the strength of his enemy. On Wednesday, the 26th of August, his advance guards were everywhere driven in. As he pushed on he discovered the enemy in great numbers, and late in the day realized that he was facing a great army.

Von Hindenburg had taken a position astride the railway from Allenstein to Soldau, and all access to his front was barred by lakes and swamps. He was safe from frontal attack, and could reinforce each wing at pleasure. From his right ran the only two good roads in the region, and at his left was the Osterode railway. On the first day he stood on the defensive, while the Russians, confident of victory, attacked again and again. Some ground was won and prisoners captured, and the news of a second victory was sent to western Europe.

The battle continued, however, until the last day of August and is known as the battle of Tannenberg, from a village of that name near the marshes. Having worn down his enemy, von Hindenburg counter-attacked. His first

movement was on his right. This not only deceived Samsonov and led him to reinforce his left, but also enabled von Hindenburg to seize the only good road that would give the Russian army a chance of retreat. Meanwhile the German general was hurrying masses of troops northeastward to outflank the Russian right. While the Russians were reinforcing one flank, he was concentrating every man he could upon the other. Then his left swept southward, driving in and enveloping the Russian right, and Samsonov was driven into a country full of swamps and almost without roads.

To thoroughly understand the plight of the Russian army one must have some idea of the character of the Masurian Lake district. It was probably molded by the work of ice in the past. Great glaciers, in their progress toward the sea, have ground out hundreds of hollows, where are found small pools and considerable lakes. From these glaciers have been dropped patches of clay which hold the waters in wide extents of marsh and bog. The country pre-

sents a monotonous picture of low, rounded swells and flats, interspersed with stunted pine and birch woods. The marshes and the lakes form a labyrinth, difficult to pass even to those familiar with the country. The Masurian region is a great trap for any commander who has not had unlimited acquaintance with the place. Causeways, filled with great care, and railroads permit an orderly advance, but in a confused retreat disaster at once threatens.

This was the ground that von Hindenburg knew so well. The Russians resisted desperately, but their position could not be held. Disaster awaited them. They found their guns sinking to the axle-trees in mire. Whole regiments were driven into the lakes and drowned. On the last day of battle, August 31st, Samsonov himself was killed, and his army completely destroyed. Fifty thousand prisoners were taken with hundreds of guns and quantities of supplies. Von Hindenburg had attained the triumph of which he had so long dreamed.

It was an immensely successful example of

that enveloping movement characteristic of German warfare, a victory recalling the battle of Sedan, and upon a scale not inferior to that battle. The news of this great triumph reached Berlin upon the anniversary of the battle of Sedan, and on the same day that the news came from the west that von Kluck had reached the gates of Paris and it had a profound effect upon the German mind. They had grown to believe that the Germans were a sort of superman; these wonderful successes confirmed them in this belief.

No longer did they talk of a mere defense in the east; an advance on Warsaw was demanded and von Hindenburg was acclaimed the greatest soldier of his day. The Emperor made him Field Marshal, and placed him in command of the Teutonic armies in the east.

But von Hindenburg was not satisfied. The remnant of the defeated army had fled toward Narev, and without losing a moment von Hindenburg set off in pursuit. Rennenkampf, all this time, strange to say, had made no move, and at the news of Samsonov's disaster he

abandoned the siege of Koenigsberg and retreated toward the Niemen. At Gumbinnen he fought a rear-guard action with the German left, but had made up his mind that the Niemen must be the Russian line of defense. Von Hindenburg, following, crossed the Russian frontier and in the wide forests near Augustovo there was much fighting.

This action, described as the first battle of Augustovo, was only a rear-guard action, the Russians desiring merely to delay the enemy for a day or two. German reports, however, described it as a victory only second in importance to Tannenberg. Von Hindenburg then occupied Suwalki. He apparently had become over confident, and hardly realized that *Rennenkampf* was continually being reinforced by the Russian mobilization.

The Russian High Command understood the situation very well. Their aim was to keep von Hindenburg busy on the Niemen, while their armies in the south were overwhelming the fleeing Austrians. Von Hindenburg was deceived, and continued his advance until he

got into serious trouble. His movement had begun on September 7th; his army consisted of the four corps with which he had won Tannenberg, and large reinforcements from Germany, including at least one guards battalion, and a number of Saxons and Bavarians. The country is one vast mixture of marsh and lake and bog. The roads are few, and advance must therefore be slow and difficult. Rennenkampf made no attempt to delay him beyond a little rear-guard fighting. The German army reached the Niemen on September 21st, and found behind it the Russian army in prepared positions, with large reinforcements from Vilna.

The river at this point was wide and deep, and hard to cross. The battle of the Niemen Crossings was an artillery duel. The Russians quietly waited in their trenches to watch the Germans build their pontoon bridges. Then their guns blew the bridges to pieces. Thereupon von Hindenburg bombarded the Russian lines hoping to destroy the Russian guns. On Friday, the 26th, his guns boomed all day; the

Russians made no reply. So on the morning of the 27th he built bridges again, and again the Russians blew them to pieces. Moreover the marshy ground made maneuvering almost impossible. On the 28th he gave the order for retreat.

He realized that the game wasn't worth the candle; he might easily be kept fighting on the Niemen for months, while the main armies of the Russians were crossing Austria. Von Hindenburg conducted the retreat with a skill which came to him naturally from his knowledge of the marshes.

Rennenkampf followed him closely, keeping up persistent attacks through the woods and marshes. The path of the retreating army lay through the forest of Augustovo, a country much like that around the Masurian Lakes, and there the Germans suffered heavy losses. Von Hindenburg managed, however, to get the bulk of his forces back across the frontier and continued his retreat to the intrenchments on the Masurian Lakes.

The Germans lost 60,000 men in killed,

wounded and prisoners, and von Hindenburg handed over the command of the German armies in East Prussia to General von Schubert, and hastened southward to direct the movement to relieve the Austrians at Cracow.

But quite as important as the campaign in East Prussia was the struggle in Galicia. When the war began the Germans contemplated merely defense in their own domain; such offense as was planned was left to the Austrians farther south.

Galicia is a long, level country lying north of the Carpathian Mountains, and in this country Austria-Hungary had gathered together a force of hardly less than one million men. A quarter of these lay in reserve near the mountains; the remaining three-quarters was divided into two armies; the first, the northern army, being under the command of General Dankl, the second was that of von Offenbergl. The base of the first army was Przemyśl; that of the second was Lemberg.

The first army, it was planned, was to advance into Russian territory in the direction

of Lublin. The second army, stationed south-east of the first army, was to protect it from any Russians who might strike in upon the south. The first army, therefore, contained more picked material than the second, which included many troops from the southern parts of the empire, including certain disaffected contingents. The first army made its advance as soon as possible, and entered Russian territory on the 11th of August. It went forward with very little loss and against very little resistance. The Russian forces which were against it were inferior in number, and fell back towards the Bug. The Austrians followed, turning somewhat toward the East, when their advance was checked by news of catastrophe in their rear. On the 14th of August the Russian army under General Ruzsky crossed the frontier, and advanced toward the Austrian second army.

The Russian army was in far greater strength than had been expected, and when its advance was followed by the appearance, upon the right flank of von Offenbergs command, of

yet another Russian army, under Brussilov, the Austrian second army found itself in great danger. Ruzsky advanced steadily from August 14th until, on the 21st, it was not more than one day's advance from the outer works of Lemberg, and the third Russian army under Brussilov was threatening von Offenbergs right flank.

Von Offenbergs, understanding the strength of the enemy, undertook to give battle. The first outpost actions were successful for the Austrians, and helped them in their blunder. On the 24th of August the two Russian armies effected a junction, and their Austrian opponents found themselves threatened with disaster. An endeavor was made to retreat, but the retreat turned into a rout. On the 28th Tarnopol was captured by the Russians, and the Austrian army found itself compelled to fall back upon defense positions to the south and east of Lemberg itself.

The attack of the Russian armies was completely successful. The Austrian army was driven from its positions, and on September

4th the Austrians evacuated Lemberg and the Russian forces took possession of the town. The Austrians fled. The population welcomed the conquerors with the greatest enthusiasm. An immense quantity of stores of every kind were captured by the Russians together with at least 100,000 prisoners. There was no looting, nor any kind of outrage. The Russian policy was to make friends of the inhabitants of Galicia.

But there was no halt after Lemberg. Brusilov divided his army, and sent his left wing into the Carpathian passes; his center and right moved west toward Przemyśl; while Ruzsky moved northwest to reinforce the Russian army on the Bug. Meanwhile the position of Dankl's army was perilous in the extreme. There were two possible courses, **one** to fall back and join the remnants of von Offenberg's army, the other to attack at once, before the first Russian army could be reinforced, and if victorious to turn on Ruzsky.

Dankl's army was now very strong. He had received reinforcements, not **only** from

Austria but from Germany. On the 4th of September he attacked the Russian center; his attack was a failure, although he outnumbered the Russians. The battle continued until the tenth.

Everywhere the Austrians were beaten, and driven off in ignominious retreat. The whole Austrian force fled southward in great disorder; a part directed its flight toward Przemyśl, others still farther west toward Cracow. Austria had been completely defeated; except for a few German detachments near the border, Poland was clear of the enemy. The Russian flag flew over Lemberg, while the Russian army was marching toward Cracow. The Russian star was in the ascendant.

But the Austrian armies had not been annihilated. An army of nearly a million men cannot be destroyed in so short a time. The Austrian failure was due in part to the disaffection of some of the elements of the army, and in part to the poor Austrian generalship. They had underestimated their foe, and ventured on a most perilous plan of campaign.

Russian generalship had been most admirable, and the Russian generals were men of ability and experience. Brussilov had seen service in the Turkish War of 1877. Ruzsky was a professor in the Russian War Academy. In the Japanese war he had been chief of staff to General Kaulbars, the commander of the Second Manchurian army. Associated with him was General Radko Dmitrieff, an able officer with a most interesting career. General Dmitrieff was born in Bulgaria, when it was a Turkish province. He graduated at the Military School at Sofia, and afterwards at the War Academy at Petrograd. On his return to Bulgaria he commanded a regiment in the Serbian-Bulgarian war. Later he became mixed up in the conspiracy against Prince Alexander, and was forced to leave Bulgaria. For ten years he served in the Russian army, returning to Bulgaria on the accession of Prince Ferdinand. Later on he became Chief of the General Staff, and when the Balkan war broke out he commanded one of the Bulgarian armies, won several important victories,

and became a popular hero of the war. Disgusted with the political squabbles which followed the war, he returned to Russia as a general in the Russian army. With men like these in command, the Russian Empire was well served.

After the decisive defeat of the Austrian army under General Dankl, certain changes were made in the Russian High Command. General Ruzsky was made commander of the center, which was largely reinforced. General Ivanov was put in command of the armies operating in Galicia with Dmitrieff and Brussilov as his chief lieutenants. Brussilov's business was to seize the deep passes in the Carpathians and to threaten Hungary. Dmitrieff's duty was to press the Austrian retreat, and capture the main fortresses of central Galicia.

There are two great fortresses on the River San, Jaroslav and Przemysl, both of them controlling important railroad routes. Jaroslav on the main line from Lemberg to Cracow, Przemysl with a line which skirts the

Carpathians, and connects with lines going south to Hungary. Jaroslav was fortified by a strong circle of intrenchments and was looked to by Austria for stout resistance. The Austrians were disappointed, for Ivanov captured it in three days, on the 23d of September. Dmitrieff found Przemyśl a harder nut to crack. It held out for many months, while operations of greater importance were being carried on by the Russian armies. The plans of the Russian generals in some respects were not unlike the plan previously suggested as that of the German High Command. At the beginning of the war they had no desire to carry on a powerful offensive against Germany. The expedition into East Prussia was conducted more for political than for military purposes. The real offensive at the start was to be against Austria. The Russian movements were cautious at first, but the easy capture of Lemberg, the fall of Jaroslav, and the demoralization of the Austrian armies, encouraged more daring strategy. With the Germans stopped on the north, little aid to the

Austrians could come from that source. The Grand Duke Nicholas was eager to strike a great blow before the winter struck in, so his armies swept to the great Polish city of Cracow. The campaign against Austria also had a political side.

Russia had determined upon a new attitude toward Poland. On August 15th the Grand Duke Nicholas, on behalf of the Czar, had issued a proclamation offering self-government to Russian Poland. Home rule for Poland had long been a favorite plan with the Czar. Now he promised, not only to give Russian Poland home rule, but to add to it the Polish peoples in Austria and Germany. This meant that Austria and Germany would have to give up Galicia on the one hand, and Prussian Poland on the other, if they should lose the war. In the old days Poland had been one of the greatest kingdoms in Europe, with a proud nobility and high civilization. She was one of the first of the great Slav peoples to penetrate the west. Later she had protected Europe against Tartar invasion, but internal differ-

ences had weakened her, and, surrounded by enemies, she had first been plundered, and later on divided between Austria, Russia and Prussia. Never had the Poles consented to this destruction of their independence. Galicia had constantly struggled against Austria; Prussian Poland was equally disturbing to the Prussian peace, and Russia was only able to maintain the control of her Polish province by the sword. Of the three the Pole was probably more inclined to keep on friendly terms with Russia, also a Slav people. The policy of the Czar encouraged this inclination and produced disaffection among the Poles in Galicia and in Posen. Moreover, it gave Russia the sympathy of the world which had long regarded the partition of Poland as a political crime. It encouraged the Czecho-Slavs and other dissatisfied portions of the Austrian Empire.

The results were seen immediately in the demoralization of the Austrian armies where considerable numbers of Czecho-Slovak troops

deserted to the Russian army, and later in the loyalty to Russia of the Poles, and their refusal, even under the greatest German pressure, to give the German Empire aid.

## CHAPTER X

### NEW METHODS AND HORRORS OF WARFARE

WHEN Germany embarked upon its policy of frightfulness, it held in reserve murderous inventions that had been contributed to the German General Staff by chemists and other scientists working in conjunction with the war. Never since the dawn of time had there been such a perversion of knowledge to criminal purposes; never had science contributed such a deadly toll to the fanatic and criminal intentions of a war-crazed class.

As the war uncoiled its weary length, and month after month of embargo and privation saw the morale of the German nation growing steadily lower, these murderous inventions were successively called into play against the Allies, but as each horror was put into play on the battlefield, its principles were solved by the

scientists of the Allied nations, and the deadly engine of destruction was turned with trebled force against the Huns.

This happened with the various varieties of poison gas, with liquid fire, with trench knives, with nail-studded clubs, with armor used by shock troops, with airplane bombs, with cannon throwing projectiles weighing thousands of pounds great distances behind the battle lines. Not only did America and the Allies improve upon Germany's pattern in these respects, but they added a few inventions that went far toward turning the scale against Germany. An example of these is the "tank." Originally this was a caterpillar tractor invented in America and adopted in England. At first these were of two varieties, the male, carrying heavy guns only, and the females, equipped with machine guns. To these was later added the whippet tank, named after the racing dog developed in England. These whippet tanks averaged eighteen miles an hour, carrying death and terror into the ranks of the enemy. All the tanks were heavily armored

and had as their motto the significant words "Treat 'Em Rough." The Germans designed a heavy anti-tank rifle about three feet longer than the ordinary rifle and carrying a charge calculated to pierce tank armor. These were issued to the German first line trenches at the rate of three to a company. That they were not particularly effective was proved by the ease with which the tanks of all varieties tore through the barbed wire entanglements and passed over the Hindenburg and Kriemhild lines, supposed by the Germans to be impregnable.

The tanks in effect were mobile artillery and were used as such by all the Allied troops. Germany frantically endeavored to manufacture tanks to meet the Allied monsters, but their efforts were feeble when compared with the great output opposed to them.

Before considering other inventions used for the first time in this war, it is well to understand the tremendous changes in methods and tactics made necessary by these discoveries.

Put into a sentence, the changed warfare

amounts to this: it is a mobilization of material, of railroads, great guns, machine guns, food, airplanes and other engines of destruction quite as much as it is a mobilization of men.

The Germans won battle after battle at the beginning of the war because of their system of strategic railways that made it possible to transport huge armies to selected points in the shortest possible time both on the eastern and the western fronts. Lacking a system of transportation to match this, Russia lost the great battles that decided her fate, Belgium was over-run, and France, once the border was passed, became a battlefield upon which the Germans might extend their trench systems over the face of the land.

Lacking strategic railways to match those of Germany, France evolved an effective substitute in the modern system of automobile transportation. When von Kluck swung aside from Paris in his first great rush, Gallieni sent out from Paris an army in taxicabs that struck the exposed flank and went far toward winning the first battle of the Marne. It was

the truck transportation system of the French along the famous "Sacred Road" back of the battle line at Verdun that kept inviolate the motto of the heroic town, "They Shall Not Pass." Motor trucks that brought American reserves in a khaki flood won the second battle of the Marne. It was the automobile transportation that enabled Haig to send the British, Canadians and Australians in full cry after the retreating Germans when the backbone of the German resistance was broken before Lens, Cambrai, and Ostend.

America's railway transportation system in France was one of the marvels of the war. Stretching from the sector of seacoast set apart for America by the French Government, it radiated far into the interior, delivering men, munitions and food in a steady stream. American engineers worked with their brothers-in-arms with the Allies to construct an inter-weaving system of wide-gauge and narrow-gauge roads that served to victual and munition the entire front and further serve to deliver at top speed whole army corps. It was

this network of strategic railways that enabled the French to send an avalanche clad in horizon blue to the relief of Amiens when Hindenburg made his final tremendous effort of 1918.

In its essentials, military effort in the great conflict may be roughly divided into

Open warfare,

Trench warfare,

Crater warfare.

The first battle of the Marne was almost wholly open warfare; so also were the battles of the Masurian Lakes, Allenstein, and Dunojec in the eastern theater of war, and most of the warfare on the Italian front between the Piave River and Gorizia.

In this variety of battle, airplanes and observation balloons play a prominent part. Once the enemy is driven out of its trenches, the message is flashed by wireless to the artillery and slaughter at long range begins. If there have been no intrenchments, as was the case in the first battle of the Marne, massed artillery send a plunging fire into the columns moving in open order and prepare the way for

machine gunners and infantry to finish the rout.

In previous wars, cavalry played a heroic rôle in open warfare; only rarely has it been possible to use cavalry in the Great War. The Germans sent a screen of Uhlans before its advancing hordes into Belgium and Northern France in 1914. The Uhlans also were in the van in the Russian invasion, but with these exceptions, German cavalry was a negligible factor.

British and French cavalry were active in pursuit of the fleeing Teutons when the Hindenburg line was smashed in September of 1918. Outside of that brief episode, the cavalry did comparatively nothing so far as the Allies were concerned. It was the practice on both sides to dismount cavalry and convert it into some form of trench service. Trench mortar companies, bombing squads, and other specialty groups were organized from among the cavalrymen. Of course the fighting in the open stretches of Mesopotamia, South Africa and Russia involved the use of great bodies of

cavalry. The trend of modern warfare, however, is to equip the cavalryman with grenades and bayonets, in addition to his ordinary gear, and to make of him practically a mounted infantryman.

Trench warfare occupied most of the time and made nine-tenths of the discomforts of the soldiers of both armies. If proof of the adaptive capacity of the human animal were needed, it is afforded by the manner in which the men burrowed in vermin-infested earth and lived there under conditions of Arctic cold, frequently enduring long deprivations of food, fuel, and suitable clothing. During the early stages of the war, before men became accustomed to the rigors of the trenches, many thousands died as a direct result of the exposure. Many thousand of others were incapacitated for life by "trench feet," a group of maladies covering the consequences of exposure to cold and water which in those early days flowed in rivulets through most of the trenches. The trenches at Gallipoli had their own special brand of maladies. Heatstroke and a malarial

infection were among these disabling agencies. Trench fever, a malady beginning with a headache and sometimes ending in partial paralysis and death, was another common factor in the mortality records.

But in spite of all these and other discomforts, in spite of the disgusting vermin that crawled upon the men both in winter and in summer, both sides mastered the trenches and in the end learned to live in them with some degree of comfort.

At first the trenches were comparatively straight, shallow affairs; then as the artillery searched them out, as the machine gunners learned the art of looping their fire so that the bullets would drop into the hiding places of the enemy, the trench systems gradually became more scientifically involved. After the Germans had been beaten at the Marne and had retired to their prepared positions along the Aisne, there commenced a series of flanking attempts by one side and the other which speedily resolved itself into the famous "race to the sea." This was a competition between the

FORTS, FLYING AND NAVAL BASES ON THE NORTH SEA

opposing armies in rapid trench digging. The effort on either side was made to prevent the enemy from executing a flank movement. In an amazingly short time the opposing trenches extended from the Belgian coast to the Swiss border, making further outflanking attempts impossible of achievement.

This was not the first time in history that intrenched armies opposed each other. The Civil War in this country set the fashion in that respect. The contending sides in the Great War, however, improved vastly upon the American example. Communicating trenches were constructed, leading back to the company kitchens, and finally to the open road leading back to the rest billets of the armies.

When night raiding commenced, it was speedily seen that straight trenches exposed whole companies of men to enfilading fire. Thereupon bastions were made and new defenses presented by zig-zagging the front-line trenches and the communicating ditches as well.

To the formidable obstacles presented by

the trenches, equipped as they were with sand-bag parapets and firing steps, were added barbed-wire entanglements and pitfalls of various sorts. The greatest improvement was made by the Germans, and they added "pill boxes." These were really miniature fortresses of concrete and armor plate with a dome-shaped roof and loopholes for machine gunners. Only a direct hit by a projectile from a big gun served to demolish a "pill box." The Allies learned after many costly experiments that the best method to overcome these obstacles was to pass over and beyond them, leaving them isolated in Allied territory, where they were captured at the leisure of the attackers.

Trench warfare brings with it new instruments. There are the flame projectors, which throw fire to a distance of approximately a hundred feet. The Germans were the first to use these, but they were excelled in this respect by the inventive genius of the nations opposing them.

The use of poison gas, the word being used

in its broad sense, is now general. It was first used by the Germans, but as in the case of flame throwers, the Allies soon gained the ascendancy.

The first use of asphyxiating gas was by the Germans during the first battle of Ypres. There the deadly compound was mixed in huge reservoirs back of the German lines. From these extended a system of pipes with vents pointed toward the British and Canadian lines. Waiting until air currents were moving steadily westward, the Germans opened the stop-cocks shortly after midnight and the poisonous fumes swept slowly, relentlessly forward in a greenish cloud that moved close to the earth. The result of that fiendish and cowardly act was that thousands of men died in horrible agony without a chance for their lives.

Besides that first asphyxiating gas, there soon developed others even more deadly. The base of most of these was chlorine. Then came the lachrymatory or "tear-compelling" gases, calculated to produce temporary or

permanent blindness. Another German "triumph" was mustard gas. This is spread in gas shells, as are all the modern gasses. The Germans abandoned the cumbersome gas-distributing system after the invention of the gas shell. These make a peculiar gobbling sound as they rush overhead. They explode with a very slight noise and scatter their contents broadcast. The liquids carried by them are usually of the sort that decompose rapidly when exposed to the air and give off the acrid gases dreaded by the soldiers. They are directed against the artillery as well as against intrenched troops. Every command, no matter how small, has its warning signal in the shape of a gong or a siren warning of approaching gas.

Gas masks were speedily discovered to offset the dangers of poison gases of all kinds. These were worn not only by troops in the field, but by artillery horses, pack mules, liaison dogs, and by the civilian inhabitants in back of the battle lines. Where used quickly and in accordance with instructions, these

masks were a complete protection against attacks by gas.

The perfected gas masks used by both sides contained a chamber filled with a specially prepared charcoal. Peach pits were collected by the millions in all the belligerent countries to make this charcoal, and other vegetable substances of similar density were also used. Anti-gas chemicals were mixed with the charcoal. The wearer of the mask breathed entirely through the mouth, gripping a rubber mouthpiece while his nose was pinched shut by a clamp attached to the mask.

In training, soldiers were required to hold their breath for six seconds while the mask was being adjusted. It was explained to them that four breaths of the deadly chlorine gas was sufficient to kill; the first breath produced a spasm of the glottis; the second brought mental confusion and delirium; the third produced unconsciousness; and the fourth death. The bag containing the gas mask and respirator was carried always by the soldier.

The soldier during the winter season in the

front line trenches was a grotesque figure. His head was crowned with a helmet covered with khaki because the glint of steel would advertise his whereabouts. Beneath the helmet he wore a close fitting woolen cap pulled down tightly around his ears and sometimes tied or buttoned beneath his chin. Suspended upon his chest was the khaki bag containing gas mask and respirator. Over his outer garments were his belt, brace straps, bayonet and ammunition pouches. His rifle was slung upon his shoulder with the foot of a woolen sock covering the muzzle and the leg of the same sock wrapped around the breech. A large jerkin made of leather, without sleeves, was worn over the short coat. Long rubber boots reaching to the hips and strapped at ankle and hip completely covered his legs. When anticipating trench raids, or on a raiding party, a handy trench knife and carefully slung grenades were added to his equipment.

Airplane bombing ultimately changed the whole character of the war. It extended the fighting lines miles behind the battle front. It

brought the horrors of night attacks upon troops resting in billets. It visited destruction and death upon the civilian population of cities scores of miles back of the actual front.

Germany transgressed repeatedly the laws of humanity by bombing hospitals far behind the battle front. Describing one of these atrocious attacks, which took place May 29, 1918, Colonel G. H. Andrews, Chaplain of a Canadian regiment, said:

“The building bombed was one of three large Red Cross hospitals at Boulenes and was filled with Allied wounded. A hospital in which were a number of wounded German prisoners stood not very far away.

“The Germans could not possibly have mistaken the building they bombed for anything else but a hospital. There were flags with red cross flying, and lights were turned on them so that they would show prominently. And the windows were brilliantly lighted. Those inside heard the buzz of the advancing airplanes, but did not give them a thought.

“The machines came right on, ignoring the

hospital with the German wounded, indicating they had full knowledge of their objective, until they were over a wing of the Red Cross hospital that contained the operating room on the ground floor. In the operating room a man was on the table for a most difficult surgical feat. Around him gathered the staff of the hospital and its brilliant surgeons. Lieutenant Sage of New York had just given him the anaesthetic when one of the airplanes let the bomb drop. It was a big fellow. It must have been all of 250 pounds of high explosive.

"It hurtled downward, carrying the two floors before it. Through the gap thus made wounded men, the beds in which they lay, convalescents, and all on the floors came crashing down to the ground. The bomb's force extended itself to wreck the operating room, where the man on the table, Lieutenant Sage, and all in the room were killed. In all there were thirty-seven lives lost, including three Red Cross nurses.

"The building caught fire. The concussion had blown the stairs down, so that escape from

the upper floors seemed impossible. But the convalescents and the soldiers, who had run to the scene of the bombing, let the very ill ones out of the windows, and escape was made in that way.

“And then to cap the climax, the German airplanes returned over the spot of their ghastly triumph and fired on the rescuers with machine guns. God will never forgive the Huns for that act alone. Nor will our comrades ever forget it.”

The statement of Colonel Andrews was corroborated by a number of other officers.

To protect artillery against counter-fire of all kinds, both sides from the beginning used the art of camouflage. This was resorted to particularly against scouting airplanes. At first the branches of trees and similar natural cover were used to deceive the airmen. Later the guns themselves were painted with protective colorations, and screens of burlap were used instead of branches. The camoufleur, as the camouflage artist was called, speedily extended his activities to screens over highways,

### THE MADE-TO-ORDER INFERNO OF THE FLAME-TROWER

A "rain-of-fire" attack in the front-line trenches. This weapon was devised by the Germans and was apparently one of those pre-war inventions they had counted on to make their conquest easy. It was never as effective a weapon as gas, even when developed by the Allies, but its terrifying effect can be gauged by the illustration given.

*British light Tank*

*used at Cambrai.*

*German land battlewagon*

*used in Champagne in 1918.*

## TYPES OF LAND BATTLESHIPS DEVELOPED BY ALLIES AND GERMANS

preventing airmen from seeing troops in motion, to the protective coloration of lookout posts, and of other necessary factors along the fighting front. Camouflage also found great usefulness in the protective coloration of battle-ships and merchant vessels. Scientific study went hand in hand with the art, the object being to confuse the enemy and to offer targets as small as possible to the enemy gunners.

Crater warfare came as a development of intensified artillery attacks upon trench systems. It was at Dunajec on the eastern front that for the first time in modern war the wheels of artillery were placed hub to hub in intensified hurricane fire upon enemy positions. The result there under von Mackensen's direction was the rout of the Russians. When later the same tactics were employed on the western front, the result was to destroy whole trench systems with the exception of deep dugouts, and to send the occupants of the trenches into the craters, made by shell explosions, for protection.

It was observed that these craters made excellent cover and when linked by vigorous use

of the intrenching tools carried by every soldier, they made a fair substitute for the trenches. This observation gave root to an idea which was followed by both armies; this was the deliberate creation of crater systems by the artillery of the attacking force. Into these lines of craters the attacking infantry threw itself in wave after wave as it rushed toward the enemy trenches. The ground is so riddled by this intensive artillery fire that there is created what is known as "moon terrain," fields resembling the surface of the moon as seen through a powerful telescope. Troops on both sides were trained to utilize these shell holes to the utmost, each little group occupying a crater, keeping in touch with its nearest group and moving steadily in unison toward the enemy.

One detail in which this war surpassed all others was in the use of machine guns and grenades. The Germans were first to make extensive use of the machine gun as a weapon with which to produce an effective barrage. They established machine-gun nests at frequent in-

tervals commanding the zone over which infantry was to advance and by skillful crossfire kept that terrain free from every living thing. The Germans preferred a machine gun, water cooled and of the barrel-recoil type. The English used a Vickers-Maxim and a Lewis gun, the latter the invention of an officer in the American army. The French preferred the Hotchkiss and the Saint-Etienne. The Americans standardized the Browning light and heavy machine guns, and these did effective service. It was asserted by American gunnery experts that the Browning excels all other weapons of its type.

Two general types of grenades were used on both sides. One a defensive bomb about the size of an orange, containing a bursting charge weighing twenty-two ounces. Then there was a grenade used for offensive work carrying about thirty-two ounces of high explosives. The defensive grenades were of cast iron and so made that they burst into more than a hundred jagged pieces when they exploded. These wounded or killed within a radius of one

hundred and fifty yards. In exceptional instances, the range was higher.

The function of artillery in a modern battle is constantly extending. Both the big guns and the howitzers were the deciding factors in most of the military decisions reached during the war. Artillery is divided first between the big guns having a comparatively flat trajectory and the howitzers whose trajectory is curved. Then there is a further division into these four classes:

Field artillery,

Heavy artillery,

Railroad artillery,

Trench artillery.

The type of field artillery is the famous 75-millimeter gun used interchangeably by the French and Americans. It is a quick-firing weapon and is used against attacking masses and for the various kind of barrages, including an anti-aircraft barrage.

Included in the heavy artillery are guns and howitzers of larger caliber than the 75 millimeter. Three distinct and terrifying noises

accompany explosions of these guns. First, there is the explosion when the shell leaves the gun; then there is the peculiar rattling noise like the passing of a railway train when the shells pass overhead; then there is the explosion at point of contact, a terrific concussion which produces the human condition called "shell shock," a derangement of body and brain, paralyzing nerve and muscle centers and frequently producing insanity.

The railroad artillery comprises huge guns pulled on railways by locomotives, each gun having a number of cars as part of its equipment. These are slow-firing guns of great power and hurling the largest projectiles known to warfare. The largest guns of this class were produced by American inventive genius as a reply to the German gun of St. Gobain Forest. This was a weapon which hurled a nine-inch shell from a distance of 62 miles into the heart of Paris. The damage done by it was comparatively slight and it had no appreciable effect upon the morale of the Parisians.

Its greatest damage was when it struck the Roman Catholic Church of St. Gervais on Good Friday, March 29, 1918, killing seventy-five persons and wounding ninety. Fifty-four of those killed were women, five being Americans. The total effect of the bombardment by this big gun was to arouse France, England and America to a fiercer fighting pitch. The late Cardinal Farley, Archbishop of New York, expressed this sentiment, when he sent the following message to the Archbishop of Paris:

Shocked by the brutal killing of innocent victims gathered at religious services to commemorate the passing of our blessed Saviour on Good Friday, the Catholics of New York join your noble protest against this outrage of the sanctuary on such a day and at such an hour and, expressing their sympathy to the bereaved relatives of the dead and injured, pledge their unfaltering allegiance in support of the common cause that unites our two great republics. May God bless the brave officers and men of the allied armies in their splendid defense of liberty and justice!

Trench artillery are Stokes guns and other mortars hurling aerial torpedoes containing great quantities of high explosives. These

have curved trajectories and are effective not only against trenches but also against deep dugouts, wire entanglements and listening posts.

One of the most important details of modern warfare is that of communication or liaison on the battlefield. This is accomplished by runners recruited from the trenches, by dogs, pigeons, telephone, radio, signalling lamps, rockets, but above all by airplanes using radio. These communications between air and earth are of course not as exact nor as general by night as they are by day, but even at night the airplane plays its important part in liaison.

As has been heretofore stated, the airplane considered in all its developments, is the newest and most important of factors in modern warfare. It photographs the enemy positions, it detects concentrations and other movements of the enemy, it makes surprise impossible, it is a deadly engine of destruction when used in spraying machine-gun fire upon troops in the open. As a bombing device, it surpasses the best and most accurate artillery.
